The Customs Accounting System (CAS) is a comprehensive customs and trade compliance platform for companies that aim at centralizing, managing and automating customs & trade compliance processes.

CAS is developed with the vision of a centralized collaborative hub to manage regional or worldwide customs and trade compliance within one single platform.

Key Benefits

Strategy

Deliver strategic insights and a clear view on what is happening, by having all data, flows, costs and statuses in one single place.

Continuity

Be guaranteed operations will run 24/7 and holidays without emergency calls are now an option.

Compliant

Don't worry about legislation and compliance. Your paperwork is automated and flawless. You can now rely on your budget planning and avoid unpleasant surprises.

Cost

Insight in trade flows enable financial optimization, but also the automation and centralisation of all the information gains a tremendous amount of time and money.
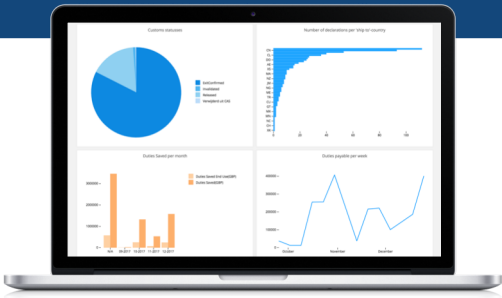

Expertise

Sleep on both ears. We use all our knowledge to make sure legislation and compliance is up to par. Also from an IT perspective, we focus on ease of use and implementation so you don't need that knowledge in your team.

Features

Strategy

Get insights you never had before with an intuitive dashboard that provides a consolidated real-time overview across all operations. Monitor your core KPI's and help steer your business.

Modern Solution

A true SaaS solution, taking away all operational complexity and allowing to you the latest and greatest version at all times.

Easily integrate with existing ERP or WMS systems via REST interfaces.

Modular

Activate the functional modules you need now for your business and expand later if needed. The system is build up granularly to guarantee maximum flexibility.

Master data management   Declarations   Special Procedures   AEO Management

Scalability

Tailor to your business needs and customs requirements. From a resource perspective as well as from a multi-country perspective, you can transparently expand or reduce if needed.

Compliance

The legal content you need will always be up to date, as we guarantee this as part of our service. No need to stay on the frontline of every legal or trade change.

Validation

Rest assured, the system will not take in any faulty information. Validation rules will be defined for automatic as well as manually inputted information. If something later on seems incorrect, we will send notifications and tasks to the right person for remediation.

Multi-country

Use different types of customs procedures across the various countries your business is active in.
