**If you need to backup your files & folders of your system to cloud, without any technical knowledge, ensure that your files are secure and easy to retrieve, whenever you desire.**

The Cloud Factory – Backup-as-a-Service, built on Azure Backup services at the backend, is a solution which has been packaged to make backup of files & folders to cloud simple, reliable, scalable, secure and cost-effective. It is very easy to restore your backup files and does not require any technical assistance and the whole process is simple enough to do it on your own. It eliminates your concerns related to creating and maintaining a cloud subscription.

## How it works?

Simple 3 step process for getting The Cloud Factory Backup-as-a-Service solution:

- Email us at [hello@tcf.cloud](mailto:hello@tcf.cloud) to receive installation guide for a **free trial** of 7 days.
- Simple installation and configuration of backup agent using the installation guide and contact our support team for any assistance, if needed.
- Start experiencing our product.

## Key Benefits

### Reliable

3 copies of the data are stored to a single datacenter location and optionally at an additional, remote datacenter.

### Secure

All backup data transfer is encrypted using 256-bit AES. The data is encrypted at the cloud storage vault and only customer can retrieve it using his secret code.

### Efficient

Once the initial seeding is complete, only incremental changes are sent based on a defined schedule. Built-in compression helps limit network utilization and throttling shapes the network traffic.
