

# Harmonise

## Onboard for Early Engagement

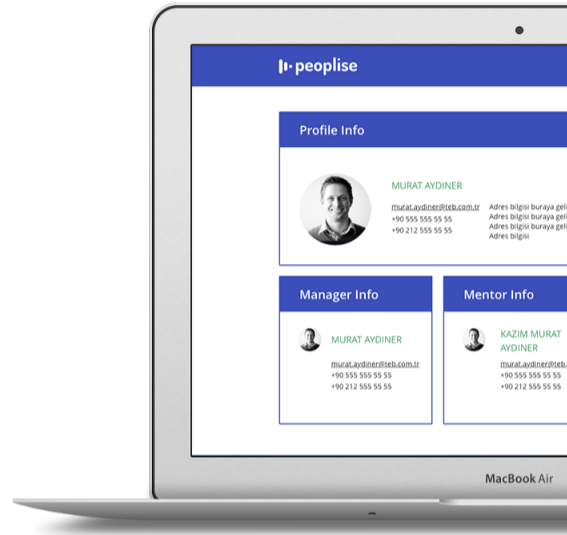

It is all about the first 90 days. Providing a great journey in the first critical experiences with the new job, team and the culture is a sure winner of hearts and minds. We help you offer a mobile, seamless and effective journey from candidate to employee, from offer to early engagement.

### On-boarding Accelerator

On-board your new employee with a full company branded interface. Design and automate work processes for on-boarding new employees: upload documents, review company information, watch videos, and conduct online training.

We generate a mobile, personal dashboard for talent to learn about your expectations, review and complete all assigned tasks, and inform all parties for a successful transition.

### Pulse Survey

Automatically generated surveys to keep tabs on the engagement journey at the end of 1st week and 90-days. We make you aware of engagement levels, issues and success, right away.

### Early Engagement Planning

Finalize the talent onboarding journey with a well designed, action provoking Early Engagement Plan to ensure a successful transition from onboarding to performance management and career development.
