

TECHNADOPT

The Technology Adoption Solution

“Through proper use of the Technadopt solution, we guarantee increased technology usage and adoption across the organization.”

Technadopt Features

Customized Tutorials

Customized tutorials covering the technology from A-Z which allows learning for novices and experts alike.

Live Online Training

Ability to attend live, online training for employees who prefer interacting with trainers or who have specific questions.

Voice Support

Support via voice to have specific questions answered or issues resolved while working on the tool/technology.

Automated Chatbot Support

Frequently Asked Questions will be answered via automated chatbot, customized to respond according to the technology.

Promotional Content

Promotional content about the technology answers the 'why' of using it. Users will understand the reason that this technology is useful and how it will change the way they work.

Document Repository

Save all technology related documents in the same area for easy access to employees for download.

User Profiles

Each user will have their own profile where they can view current and past activities on the platform.

Web Based

The web based solution allows access from any laptop or desktop device, with login for secure access.

Responsive Design

The responsive design allows easy access on tablets and mobile phone devices for learning on the go.

Users Dashboard

Administrators can add and remove users, reset passwords, and generally manage user access on the platform.

Technadopt Features

User Analytics

Administrators can view user analytics to understand what users access to understand their preferred learning and support methods.

User Reports

Managers can generate user reports to view which users regularly access the system and which users do not use it for learning.

Ease of Management

Technadopt makes it very easy to upload tutorials, schedule online training, assign support personnel, and update content.

Multiple Technologies, One Interface

Multiple, best-of-breed technologies work as the engine for this platform. Users only see a seamless, easy-to-use interface.

Multiple Privacy Options

Technadopt platform can be made open to the public or for specific users only.
