

## Flexbby Contract Workflow Management RU Edition

Flexbby Contract Workflow Management is business process and workflow automation software for Contract Lifecycle Management (CLM).

Flexbby Contract Workflow Management helps you manage all processes of approval of contractors and suppliers, contracts, payments and other documents.

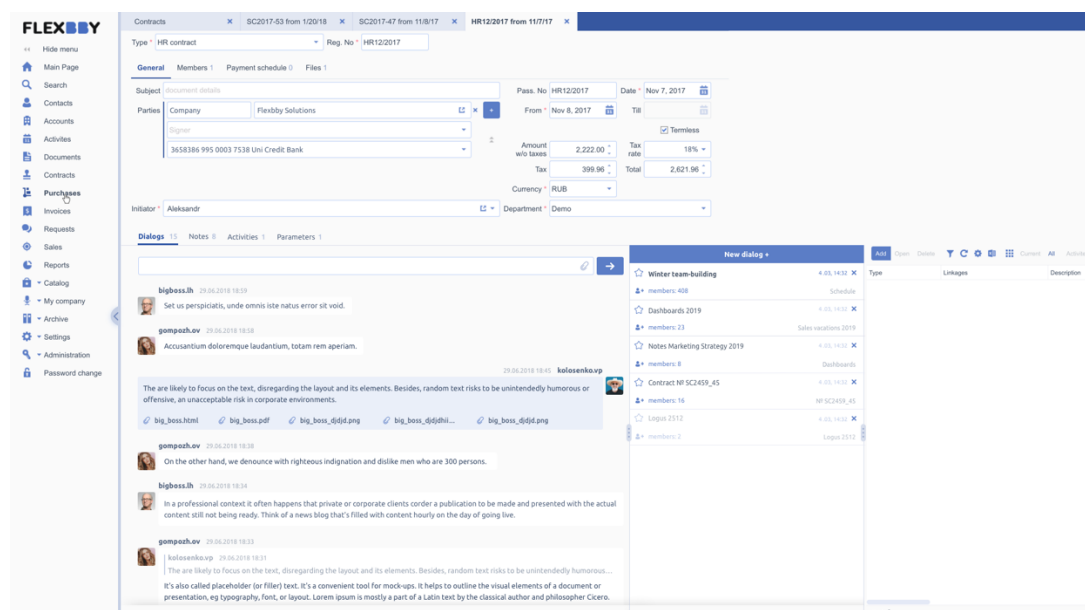

You will get full control over incoming, outgoing and other documents.

All the databases of customers, contractors, suppliers, contracts, documents, payment, invoice and approvals results are stored in a single place.

You can protect documents from being modified when it is required.

You will apply approval process so that it can be completely automated from the beginning to checking the powers and authority of the approval person.

- it's not necessary to manage workflows manually anymore, because our solution automates them based on predefined conditions, events and triggers.
- it's not necessary to control the contract lifecycle. The software can do it for you by setting the system in such way that all approvals, payments, and prolongations are performed without your participation
- it will be convenient to work in a system that notifies you of the minimal required actions and shows other users' comments
- our program will close all financial operations automatically and send documents both to your programs and to external addresses, such as e-mail, Telegram, WhatsApp, FTP-server and cloud storage.
- employees' activities and analytical data providing in any format and for any period of time.
