## Trusted communications

Azure cloud native, Office365 centric enterprise platform for secure document exchange enabling trusted communications

Fenestrae SDX runs on Azure, in ISO certified data centers, designed to run 24/7, 365 days a year, with an implemented set of global standards and management controls.

### Why customers use Fenestrae SDX?

Fenestrae SDX is the proven alternative to fax or courier services for the guaranteed, secure exchange of sensitive and/or legally binding information.

Fenestrae SDX contributes to compliance de-risk.

Fenestrae SDX provides insights into what information is exchanged when and with whom for full control.

Fenestrae SDX delivers an immediate return on investment.

### Trusted Communications

**Guaranteed, timely document delivery that contributes to achieving compliance objectives.**

### Keep data safe

**Integrity and reliability keep (customer) data safe and secure.**

### Improved Efficiency

**Improved efficiency of the customer journey, positively impacting customer service, resulting in customer satisfaction and loyalty.**

### Lower Operational Costs
