Power BI Solution for Azure IoT Central Cost Estimator

2/14/19

This document provides an estimate of the costs. These costs are estimates only and subject to change and vary by region. Please refer to [Azure pricing calculator](#) to learn more.

The cost of the Power BI Solution for Azure IoT Central is the total of the costs associated with the Azure resources used within this solution along with costs associated with your Azure IoT Central application and your Azure Blob storage.

Three Azure resources are consumed as a part of this solution:

- Azure Functions
- Azure Data Factory
- Azure SQL Database

Power BI costs are not included in this document. Power BI Desktop is free but sharing with coworkers and uploading reports online requires a paid tier. The Power BI cost estimator is available [here](#).

The solution can be broken down into fixed and variable costs per month, varied by region. Below are the breakdowns for East US.

Fixed Costs

App Service Plan (S1) for Azure Functions	$74.40
Azure SQL (S1)	$30
Total Fixed Cost	**$104.40**

Variable Costs

- Azure Data Factory: 2 activities every 15 minutes, ~$3/month
