

*notion me*

Vast quantities of knowledge lie unused and unappreciated across all types of organizations

Using the wisdom of the crowd, NanoNotion helps organizations to recognize, curate, surface, and magnify valuable knowledge

Microsoft  
Azure

Certified

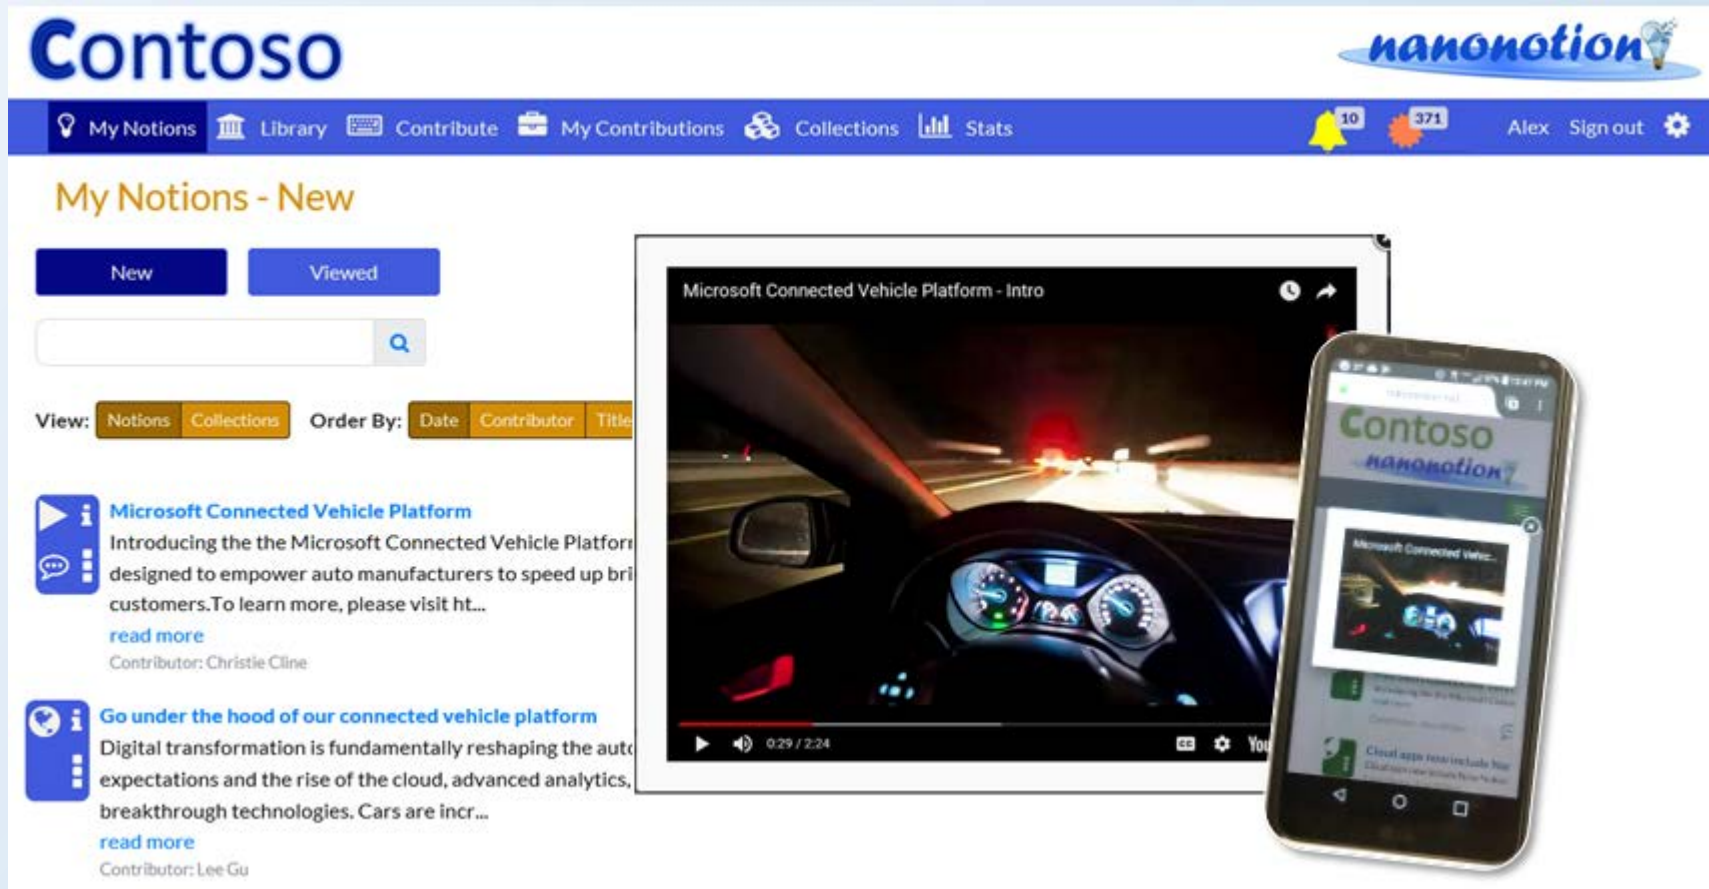

# Powerful Features

-  Surface Information that is valuable to the organization
-  Turn knowledge into valued products or services
-  Informal and social knowledge sharing
-  Reward users for their contribution of informal knowledge
-  Capture and measure institutional knowledge
-  Share and exchange ideas
-  Validate reading of policies and procedures
-  Rapid employee onboarding

# Let Your Creativity Flow

NanoNotion is easy to master, quick to deploy, configurable, and responsive designed

# Leverage Microsoft Technologies and Applications

NanoNotion is a first of its kind, born on Azure SaaS application that takes advantage of Azure's infrastructure and scalability, Azure AD, Azure SQL, Azure and Office 365 Groups, API's, support for mobile devices, and much more.

Enhance the value of your Microsoft Office and Office 365 applications and services investment with the addition of NanoNotion.

Create Notions from a variety of Office 365 document types, including Word, PowerPoint, and Excel.

Easily insert links to support a Notion from materials located on OneDrive for Business and SharePoint.

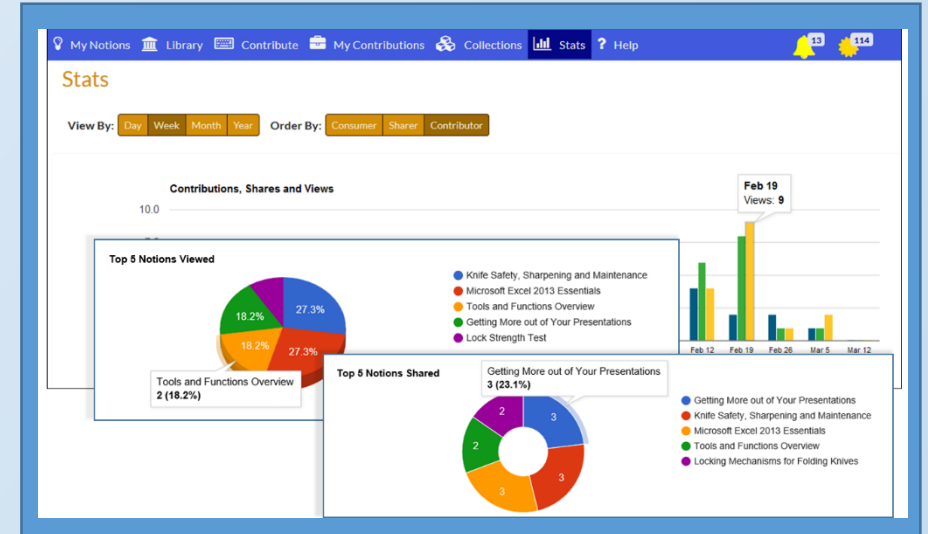

Use Microsoft Teams to socialize Notions, which helps to surface valuable knowledge. Once knowledge has value, use Teams to help transform knowledge into products and services.

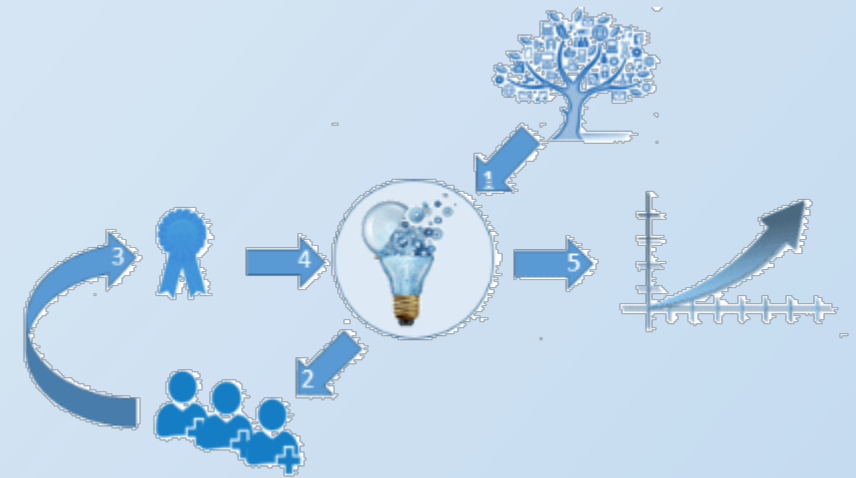

# Using Knowledge Management, Socialization and Rewards to Create Value

- Helps to organize, socialize, reward, and create value out of knowledge for users within an organization
- Extends an organization's existing Azure AD infrastructure into the resources available anywhere within an organization or the Web
- Provides valuable metrics that highlight the impact on organizational performance
- Is a born on Azure-based Software as a Service application with Microsoft Azure scalability
- Is a first of its kind Informal Knowledge System

1. Users contribute a Notion by associating its summary with supporting material from a variety of in-place sources such as SharePoint, OneDrive, and URL's.
2. The contributor then publishes the Notion so it can be shared and consumed.
3. Award points accrue for the contributor, sharer, and consumer as the Notion is socialized.
4. The visibility of the Notion increases as it is shared and consumed throughout the organization.
5. The best ideas surface, creating feedback and value to users and the organization.
