Stay Online by Using Corporate Intranet on Your Smartphone

LS Intranet app is easily deployed with both Android and iOS mobile devices.

So, now it's possible to have almost all the LS Intranet functionality no matter where you are. As well our mobile applications support multilingual interface.

Easy Branding and Customization

The image shows three tablets displaying the LS Intranet interface. The central tablet is in the foreground, showing a 'BRANDING TOOL' sidebar on the right. The sidebar includes sections for 'STYLES' and 'WIDGETS', 'PREDEFINED COLOR THEMES' (with a 'Select A Theme' dropdown and 9 theme color palettes), 'Set font color', 'Set font size (px)', 'Border' (with 'Set border color', 'Set border width (px)', and 'Set border radius (px)'), 'Block Effects' (with radio buttons for 'None', 'Outer Shadow', and 'Outer Glow'), and 'Text Effects' (with radio buttons for 'None', 'Outer Shadow', and 'Outer Glow'). At the bottom of the sidebar are buttons for 'Apply', 'Save', 'Discard Changes', and 'Reset All Styles'. The main content area of the central tablet shows a news feed with articles about Microsoft's new Edge saving plan, Microsoft's acquisition of Genie, and Microsoft's cloud strategy. Below the news feed are sections for 'Birthdays' (featuring Linda Howard), 'Newcomers' (featuring John Lewis, Jennifer Webster, and Gale Davenport), 'Rewards' (featuring a 'name for our new product' contest), and 'Idea Box' (featuring a contest for a new product name and logo). The two tablets in the background show the same interface but with different branding and layout customizations, demonstrating the flexibility of the LS Intranet.

- 1 Choose one of the predefined color themes
- 2 Drag&drop to change layouts and widget sizes
- 3 Change any graphics object on a screen with our featured Branding Tool

Affordable Pricing

Cloud
or
On-Premises

Deployment in Office 365
or on local servers with
SharePoint Server
