# MiGreat!® Process Management Enablement

MiGreat!® is the online application that enables you to easily structure your projects and drive them forward with full transparency. Program/Project/Portfolio Planning, Project Monitoring, Product Tracking and Realtime Reporting are some of the great features that will help you make every project a success!

Common migration project & program challenges

✕ Debates about scope & scope creep
✕ Delays due to unknown dependencies
✕ Multiple spreadsheets and project files
✕ Lack of insight in S.M.A.R.T. progress
✕ Lack of focus on the right action or problem
✕ CMDB Quality issues before and after every project

*With **MiGreat!®** these common program and project challenges can be easily overcome. Within a couple of days, you're fully up and running and ready to start focusing on the real challenge, getting your projects done! The process to get there is simple: define your reporting requirements, define your organisation, define your program and/or projects based upon predefined templates and go!*
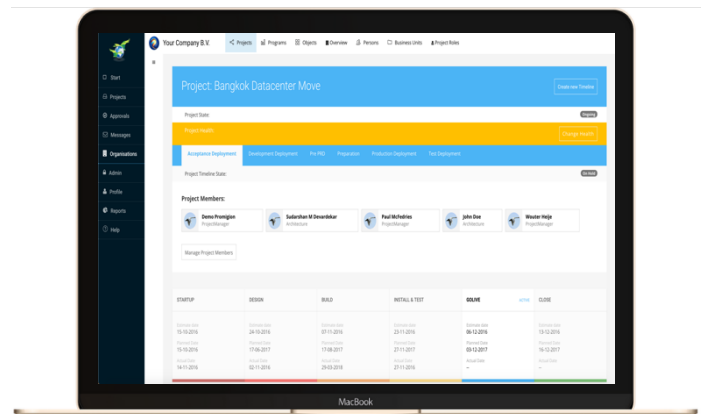

How does MiGreat!® help you?

✓ Single source of truth
✓ Clear insight in progress of complete scope
✓ Direct focus on projects that need attention
✓ Easy to operate interface on all devices
✓ Single click drills down from Program to Product level progress
