> PRIVA ENERGY & COMFORT OPTIMIZER (ECO)
USING AI TO IMPROVE COMFORT WHILE REDUCING ENERGY CONSUMPTION

Priva ECO is a self-learning software tool that automatically optimizes climate conditions and energy usage in your building, based on historical and real-time data. 24 hours a day. 7 days a week. Without any human intervention.

BETTER WORKING

Perfect climate conditions in every room

Priva ECO enables you to create a great working environment where people can develop their talent in the best possible conditions. The tool incorporates measured and desired climate conditions for every zone in the building, based on pre-defined personal preferences of users.

SMARTER ENERGY

Using data to re-think the way we use energy

Priva ECO helps you make the transition to a more sustainable use of energy in your building. The tool reduces energy consumption based on historical and real-time data inside and outside your building, anticipating changes in the weather and predicting the actual behavior of your building. It gets the best out of your existing installations, making optimal use of renewable sources, low-temperature heat production and thermal storage in your building and installations.
