

#1 Enterprise File Share, Sync, Backup and Mobile Access for Business

Top 10 Benefits

1 **Best ROI in the Industry**

Lower cost, higher value, free unlimited partner accounts

2 **Secure Access**

Web, sync, drive, mobile apps, cloud enabled file servers

3 **Site Sandbox**

Isolated sites - site sandbox, better security and performance

4 **Security and Data Protection**

Two factor authentication, SSL/TLS, ransomware protection, endpoint and server backup

5 **Custom Branding**

Use your own domain, design, logos, email and terms of service

6 **Powerful Administrator Tools**

Analytics, reports, workflows, auditing, EMM

7 **File Sharing and Collaboration**

Public and private shares, team folders, low level granular permissions

8 **Microsoft Office Integration**

Office Online, Outlook, Email add-ons

9 **Data Residency**

Store data at your preferred region (US, EU, APAC) on world class infrastructure

10 **Premium Technical Support**

Fast response, remote troubleshooting

Secure Remote Access

Always have secure remote access to your files. FileCloud offers many ways to access your organization's files securely: web access, sync, virtual drive, mobile apps, WebDAV and browser add-ons. It protects your files and makes them available to you across all of your devices.

The Best Return On Your Investment

FileCloud includes features and customization that competitors typically charge extra. We offer more, for a quarter of the price of our competition. To further reduce costs, FileCloud gives you an unlimited number of free accounts for your clients and partners. They will have web-only access to the files you choose to share.

Smart Drive

Our FileCloud Drive app mounts your cloud space as a local disk. It provides access to terabytes of files without consuming local storage. Virtual drive helps limit offline copies of files and comply with regulations.

Share Securely

Create public, private or password protected links. Securely receive files and set up group spaces for team file sharing. Mark your files view only, restrict the number of downloads, make them available for a limited time, FileCloud lets you share how you want.

Site Sandbox

FileCloud uses unique site sandbox architecture to provide maximum security. Our dedicated instances will isolate your site to eliminate the risks associated with other SaaS cloud services.

Unparalleled Branding Options

You put a lot of resources into creating your brand, now put it front and center. Customize your background design, logos, fonts, email templates, terms of service and more. Run FileCloud from your own domain and you control almost everything.

Cloud Enable Your File Server

When your file server is the central location for all of your data, accessing remote enterprise files through FTP and a VPN is cumbersome. FileCloud brings more efficiency to your file server, making it easier to access, share and track your data from anywhere.

Total Security

FileCloud uses modern state-of-the-industry encryption and secure transfer protocols to keep your files safe. Configure your security policies easily for many levels of protection, including multi-factor authentication, SAML Single Sign-On, customer held encryption keys, virus scanning, ransomware detection and mobile device monitoring.

Powerful Administrator Tools

FileCloud helps you deploy and manage thousands of users and millions of files. Your administrator dashboard gives you powerful tools to track your files, including usage trends, geographical data and other key analytics. Apply global policies, customize user experience, automate document workflows, view reports and perform granular auditing all with FileCloud.

Full Backup and Data Loss Prevention

Know your files will be safe in the event of an accident or disaster. FileCloud offers full secure endpoint server backup and self-service restoration. Recover files from the recycle bin or revert to a previous state with unlimited file versioning.

Ransomware Protection

Cybercriminals try to exploit your trust and find vulnerabilities in your network. FileCloud comes with an industry-first heuristic engine to detect ransomware early. We limit your exposure to malicious attacks and our customization features provide strong protections against malware, email spoofing and other threats.

App and Client Management

Monitor your modern BYOD workforce in real time. Your administrators can selectively remove or block data access to suspicious devices. In the case of a lost or stolen mobile phone, admins are able to protect confidential files by remotely wiping FileCloud data from that device.

World Class, Global Infrastructure

FileCloud is hosted in secure, world class data centers. Data storage is available in the region of your choice: US, EU, APAC and SE Asia to meet strict data residency requirements.

Scalable

With high-availability, automated server backup and rollback features, FileCloud can be scaled to large deployments.

Branch Office Synchronization

With our ServerLink technology, each of your offices can run a separate FileCloud instance which synchronizes its data with other branches and your headquarters. This provides high performance, maximized uptime, and can link organizations across the world.

Integrate with Microsoft Office and Microsoft Outlook

Store your Microsoft Office files in FileCloud and you can open, edit and save right from the app or using a browser. Automatically upload email attachments and share secure links with the FileCloud Outlook add-on.

FileCloud features

Remote Access	Server Run FileCloud on your own server	Online We host FileCloud for you
Desktop Sync – Cross Platform (Windows, Mac, Linux)	✓	✓
Selective Sync (Sync only sub set)	✓	✓
Virtual Drive on a PC , MAC	✓	✓
File/Folder Search	✓	✓
Content/Full Text Search	✓	✓
Real time Network Share Sync	✓	✗
Storage Limits	Unlimited	1 TB for 5 users, 100GB/user
Large File Support, Max file size	✓	✓
Document Preview	✓	✓
Drag/Drop Upload	✓	✓
Multi-file Download as Zip		

Sharing and Backup	Server Run FileCloud on your own server	Online We host FileCloud for you
Public, Private and Time Limited Shares	✓	✓
Free, Unlimited Client Accounts	✓	✓
Share Multiple Files and Folders	✓	✓
