

# CoreToEdge – SAP as a Service on Azure

**coretoedge**  
COVERING THE WHOLE IT

# Why SAP as a Service on Azure?

## Challenges

- Speed of deployment
- Hardware lock with onPremise Investment
- Unlimited capacity for server, backup, storage
- Scaling up/down

SAP HANA system sizings depends on the size of the database and mostly unpredictable due rapid changes on demands from Busiess Units. You need a flexible, cost effective infrastructure to adapt changes quickly.

## Ideal Solution

- Flexibility to ramp up or down quickly without prohibitive investment
- Ability to try, evaluate, and deploy innovation quickly
- Pregonfigured compute, network and storage for SAP HANA

Customers requires a suitable platform on which to run its project environment for new implementation or migration projects. This had to be combined with cost savings, accessibility to the service provider, and scalability after Go-Live.

## Desired Outcomes

- Azure provides an always-on infrastructure globally
- Customer able to deploy/undeploy systems based on their needs.
- Being ready for unpredicted sizing for Productive Systems.

Azure gives customers IT Team the comfort of quickly instal/uninstall SAP systems at any size from 128GB to 20TB based on the Business needs. Azure enables IT departments to convert CAPEX to OPEX.

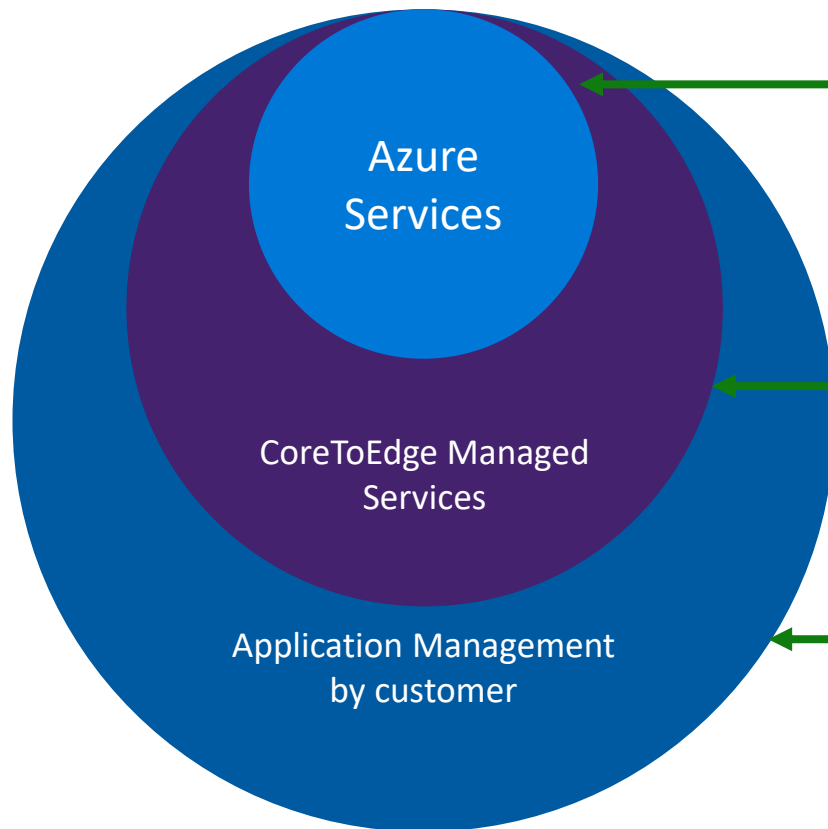

# How does SAP HANA as a Service fit into the Cloud Methodology?

- Private Managed Cloud + Managed Services
- Supporting the SAP Business Suite of applications (ex. SAP ERP, SAP CRM, SAP BW, SAP SCM on SAP HANA)
- Combines CoreToEdge's 18 years of mission-critical experience with the highest pool of SAP HANA expertise
- Host of services to meet every need of your business
- Bring your own HANA License + monthly Managed Cloud subscription fee

| Solution Stack | On Premise | SAP HANA as a Service on Azure (PaaS)         |
|----------------|------------|---|
| Applications   | You Manage | You Manage                                    |
| Data           |            |   |
| Runtime        |            | We Manage<br>(SLA based monthly subscription) |
| Middleware     |            |   |
| Database       |            |   |
| O/S            |            |   |
| Virtualization |            |   |
| Servers        |            |   |
| Storage        |            |   |
| Networking     |            |   |

# Introducing the Customized Cloud Experience with CMS

# Customer Success Story

# Penti

After researching different options, Penti Giyim decided to deploy their SAP Retail on HANA project to the Microsoft Azure cloud platform and partner with CoreToEdge to make the transition.

“As we made the digital transformation, we needed a reputable partner with the right experience. Hosting SAP on an Azure platform is a perfect fit from a cost and flexibility perspective, and we are very excited about the deployment. We followed a very quick planning and execution cycle to get up and running.” says **Engin Sahin, IT Manager - Penti.**

## Win Results

### **320K\$ Azure Deal**

We successfully agreed with customer to go live on Azure with 28 SAP Solutions running on HANA platform.

### **First SAP Retail on SAP S/4HANA**

This will be the first SAP Retail Project on Azure within the region.

### **Flexibility**

As customer has no idea the required HANA capacity for their go-live date, Azure perfectly fits for their need to start the Project.
