sagitec

Sagitec HealHub™ – Digital Health Stack

Foundation for Your Digital Health Journey Covering
Data Infrastructure, Analytical Operations, and Program Delivery

Dynamic DataOps Platform for Healthcare Firms

Sagitec's HealHub™ is a HIPAA compliant digital health stack for Healthcare firms to foster collaboration between Data Science/Analytics and Operations teams. Product tiers provide a gradual evolution from a free trial to sandbox to production.

Reduced Complexity and Cost

- A digital health stack that can support a range of use cases across the Healthcare/Pharma value chain and provide a gradual evolution from POC to sandbox to production
- Delivered at 1/10th the cost and 70% reduced implementation time
- Built on Azure, HIPAA compliant with adherence to data residency/PHI regulations

Born Digital and Healthcare Ready

- Ready pipes for enterprise, social, and IoT based health data.
- Various data switches available – Mirth Connect, Validic, and UMLS Listeners
- Data wrangling tools available to cleanse and derive ‘clean data’ from pipes
- Pre-built workloads, models, and tools focused on providers and patients
- Analytics and Ops workbench to foster collaboration between the two

Quick Start

- Ability to merge data sets through metadata
- Report Library with over 200 standard reports
- Integrated Analytics and Ops workbench (published models can be used by Ops team for rosters, reports, and campaigns)
- API enabled for building data driven apps

Flexible, Secure, and Cost-Effective Digital Health Stack on Microsoft Azure Government for HLS and HS Firms

WHAT WE OFFER

Data Switches

Ability to ingest various types of healthcare data.
Pre-built data pipes for sources below:

- Clinical, Lab, EMR
- Social – Patient reviews, forums, blogs, feeds
- Sensors and personal medical devices
- Enterprise – Claims, CRM

Analytics Library

Model and tool library for quick start.

- Disease Conditions (26)
- Episode of Care (84)
- Therapeutic Classes (45)
- Waste and Abuse (500+)
- Provider and Procedure Specialization (100+)
- Behavior Segmentation

Analytical Operations

- Ability to merge data sets through metadata
- Report Library: Over 200 standard reports
- Integrated Analytics and Ops workbench: Published models can be used by Ops team for rosters, reports, and campaigns
- API enabled for building data driven apps

Azure Stack

- Azure Data Lake
- Azure Data Lake Factory
- Azure Data Catalog
- Azure SQL Database
- R-Server + HDInsight
- Azure ML Web Service
- Azure ML Studio
- R-Studio
- Power BI
- Azure IoT

Why MS Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

Why Sagitec

- Microsoft Gold Certified Partner and Solution Partner of the Year for 2016
- Over 100 man years of Health care and Life Sciences experience
- Extensive experience in regulatory and compliance space
- Over 13 years of Product Engineering experience
- Global talent pool with expertise in Microsoft and Digital technologies
- Framework and solution accelerators for implementing innovative software solutions built on Microsoft platforms

What Our Customers Are Saying

“I believe big data and analytical platforms will drive decision making and offer insights that can optimize performance across enterprises. HealHub™ promises to be one such platform.”

– Ramesh Bulusu, CIO of United Educators
