SEEDS

MANAGEMENT SOLUTION
FOR SEED PRODUCTION
smag

TRACE, PLAN AND SUPERVISE

your seed production

Agreo Seeds software covers all of your seed station processes, from production planning to seed processing, through to logistics and invoicing of batches.

A complete web-based offer in Cloud format simplifies access to technical and agronomic information for all your employees.

Production plans	**Inputs and valuation**	**Reception, acceptance, drying**
Varietal base	**Reference documents**	**Stocks**
Plots and crop monitoring	**Manufacturing**	**Delivery, invoicing**

Our promise ?

To support you in the digitalisation of your production processes

Our consultants will study your digital project: from configuration to training in how to use the tool.

Agreo Seeds software is customisable and therefore designed to meet your specific production requirements.

The User Club gives you the opportunity to collaborate towards the improvement and development of your tool.
