

Smart Transportation

Full operations control, from the comfort of your desk!

Moving assets are a vital aspect of success to a multitude of businesses. Inefficient management of fleet operations and maintenance can pose great pains to a business' overall quality of performance and finances.

What is Altair FMS?

ALTAIR Fleet Management is an intelligent, intuitive, and integral solution with inclusive fleet monitoring and management capabilities. It leverages Microsoft technology, to empower our customer with operational intelligence, providing them with live fleet tracking with vehicle diagnostics capabilities, fleet operations and maintenance, and a set of comprehensive analysis and reporting tools, as well as tailored vertical-focused solutions. Altair FMS is an extensible platform with **Dispatching** and **Task Force Management** services.

Our clients include but are not limited to; Governments and Enterprises in the Distribution, Tourism, Oil & Gas, and Transportation sectors.
