# Smart Quality Control
Digital, mobile and easy

Are you struggling with old fashioned quality control due to the fact that your company still relies on processes based on excel and paper checklists? In this case Testify offers an easy to implement solution for integrity, automation and real-time-reporting of your quality and resilience factors.

How it works

Testify is an Azure-based facilitating software tool by boosting the planning, execution and analysis of quality control tasks along the value chain and lifeclycle of products. Furthermore Testify allows real-time Issue-Tracking and collaborative problem solving backed with multimedia.

Why customers use Testfy?

- ☑ Higher efficiency by avoiding manual data transfer
- ☑ Data integrity and traceability due to real-time data collection
- ☑ Elimination of error sources
- ☑ Easy implementation through Software as a Service (Saas)
- ☑ Real-time analyses and predictions based on collected data

Higher efficiency

- ☑ Complete digitalization of quality control
- ☑ Intuitive data capture on mobile devices (iOS and Android)
- ☑ Supported with multimedia and troubleshooting

No more manual data transfer

Integrity and traceability

- ☑ Integrity through immutable data and time stamps
- ☑ Traceability through clearly assignable tasks
- ☑ Immutable PDF-reports

Real-time data collection

Reporting and analytics

- ☑ Comprehensive individual reports with MS PowerBI
- ☑ Tracking of inspection and issue handling
- ☑ Easy identification of key performance indicators

Elimination of error sources

> *Final inspection of a vehicle, including both the inspection itself and any necessary repairs, used to take three days on average. With Testify, we are able to save a full day."*
