

VISIBILITY. COMPLIANCE. CULTURE.

AI-Infused Compliance and Culture Protection with Monitoring

Aware by Wiretap seamlessly integrates with **Teams (Skype), Yammer and Groups**, delivering exceptional classification, control and visibility into employee generated content (Public, Private, External/Guest).

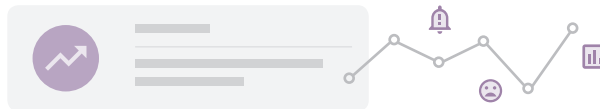

WITH AWARE, YOUR ORGANISATION CAN ...

- **Enable** compliance with regulations such as the GDPR, HIPPA, FINRA and more ...
- **Facilitate** safe collaboration by monitoring shared files and materials for insider threats
- **Protect** organisation culture by uncovering harassment and other unacceptable behavior
- **Discover** top performers and company champions who help reinforce digital workplace culture

AI INFUSED, EASY TO CONFIGURE

Aware provides the ability to configure custom policies in order to identify and respond to incidents that are important to the individual organization. Organizations can even set automatic actions based on the triggering incident. Most importantly, custom policies are easy to create, reduce noise and don't require IT support.

ATTAIN ACTIONABLE INSIGHTS

Enterprise leaders deserve tools that provide value and make decision-making simpler. Aware not only enables enhanced visibility, but also leverages a proprietary AI-infused classification engine to offer accurate, actionable insights from the vast amount of unstructured data housed within your organization's collaboration environments.

Installation Effort: **SMALL**
