

YOUREDI iPaaS

BACKBONE OF DIGITALIZATION

Youredi's iPaaS is a cloud-based integration platform built to serve as the backbone of digitalization. Developed to tackle even the most complex integration needs of any industry, it's the right tool for connecting systems & applications, transforming data, and orchestrating processes. Our customers use our platform to share a single truth about their processes by having the right information available, in the right format, at the right time, for the right stakeholders. The platform provides users with transparency into the data and processes that is necessary for streamlining operations, making better decisions, improving forecasting and planning, and identifying trends to better meet needs of the customers.

Connectivity

In the modern business world, you need to be able to transfer information both internally and externally. Youredi provides a rich set of integration functionalities that can be leveraged with both internal integration as well as business-to-business integrations - all through one single platform.

Data Exchange

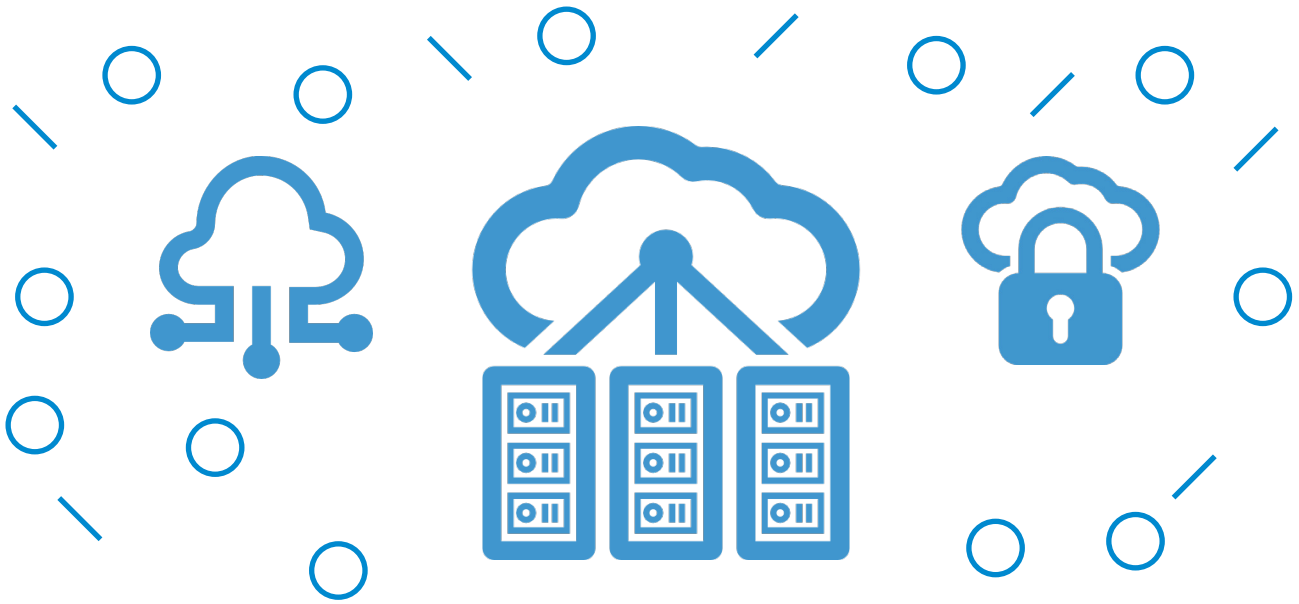

Youredi's iPaaS can understand, validate and transform any message formats, as well as it can combine traditional batch-based transfers with modern event-based protocols. It makes possible to combine your legacy with all modern interfaces available.

Process Orchestration

iPaaS provides all the necessary building blocks to enable information exchange between different applications and tools for orchestrating the information exchange based on your specific needs. Using Youredi's process orchestration tools enable to create, manage and monitor data flows. The solution can be changed anytime, based on the changes in the business processes.

OUR OTHER SOLUTIONS

Youredi Analytics

Youredi Analytics is Business Activity Monitoring tool that provides data and valuable insights regarding your information flow, processes, transactions, and stakeholders. More than just a spreadsheet about your events, Youredi Analytics monitors and measures the performance of your processes that have been integrated through our iPaaS platform. Our customers use Youredi Analytics to measure vendor performance, identify abnormalities, enhance transparency for all stakeholders, understand trend in the marketplace and predict future events.

Youredi BOT

When using Youredi's iPaaS platform, you can connect your systems with the Youredi BOT. Youredi's chatbot technology can be easily integrated to any of your applications whether on-premise or in the cloud. It is a conversation engine that provides a customizable conversation channel between your business applications and your customers. It can optimize your support performance and provide a fast and reliable interface to your customers.

ABOUT YOUREDI

Youredi provides a cloud-based integration platform, a service (iPaaS) capable of connecting systems and business applications to enhance cooperation with your partners. Regardless of the data or message format, the exchange of information is seamless. Using our integration solution and our business activity monitoring tool, you can optimize and speed up your processes, reduce overhead costs, and boost your competitiveness.
