

Stop Crime in your Stores

Auror is a crime intelligence platform built on Microsoft Azure that allows retailers to stop crime in stores.

Report crime in minutes

- File incident reports from any device quickly & easily.
- Securely store & review all digital evidence, including CCTV.
- Track outcomes of each criminal report across the company in seconds.

Solve complex cases, easily

- Automatically link offenders and vehicles whenever they offend.
- Gain a comprehensive understanding of each offender and their history.
- Understand and eliminate repeat and ORC gangs.

Stop crime before it happens

- Real time alerts of persons or vehicles of interest as they arrive at your stores or nearby.
- Empower store teams with the intelligence to be proactive.
- Collaborate within your store network and with trusted third parties on threat prevention.

Why Auror?

Improve profitability

Increase preventions and allocate security resources where they're needed.

Reduced loss by over 25%
over last two years.

National Homewares Chain

Time Savings

Upload incidents in under
5 minutes.

Rolled out to 800 stores with no training,
100% stores activated in 2 weeks.

Major Australian Supermarket

Keep staff & customers safe

Empower store teams with
real-time intel to prevent offenders
before they offend.

“Our stock loss figures are tracking well
down on where they were from last year.”

National New Zealand Grocer
