Who is Central Logic?

Central Logic is leading the innovation of healthcare software solutions by providing real-time visibility into a patient's journey through the care continuum. Our patient-centered care approach helps providers enhance quality, increase revenue, and reduce costs through improved efficiencies. Central Logic's "end-to-end" suite of comprehensive software solutions connects, captures, and reports on critical patient care issues by gathering information during all phases of care delivery.

What is Central Logic Transfer Center™?

Our SaaS-based transfer center technology leverages Central Logic On Call Scheduling™ and Central Logic Advanced Reporting™ modules, providing the most robust solution in the marketplace. Health systems utilizing Central Logic Transfer Center™ technology solutions place the right patient, in the right facility, in the right bed, the first time! Central Logic Transfer Center™ is truly the most reputable and comprehensive transfer center solution on the market.

- Operationalizes and measures every aspect of a patient's movement in real time

- Creates a consistent process to effectively and efficiently transfer a patient

- Gives visibility into payer mix and transfer referral patterns

- Decreases operating costs and improves the overall quality of medical care, service, and treatment

- Reduces hours spent creating, maintaining, and distributing on-call paper schedules

- Handles all pages, emails, and text messages with data encryption and full transmission security, ensuring HIPAA compliance

- Provides hospital leadership, physicians, nurses, and support staff with role specific oversight and real-time reporting capabilities for better clinical and operational business decisions

- Captures data from a variety of sources; the information is stored and translated to deliver focused, valuable, impressionable real-time, actionable data that is easily understood

Why Is Central Logic Transfer Center™ Needed?

Central Logic Transfer Center™ is a software solution combined with process improvement engagement to effectively and efficiently transfer patients into the hospital. Capable of streamlining both clinical and operational processes, Central Logic Transfer Center™ produces desired outcomes and promotes consistency in service. As pioneers in patient flow, we understand how to build strong referral relationships and maximize referring physician relationships. This expertise delivers a best-in-class transition of care, allowing for seamless clinical hand offs, tracking and monitoring timely transitions of care, and delivering real-time reports that allow hospital staff to make actionable decisions.

How Can Central Logic Transfer Center™ work for your Hospital?

Central Logic Transfer Center™, along with the Central Logic On Call Scheduling™ and Central Logic Advanced Reporting™ modules, improves a hospital's financial performance, drives process, decreases operating cost and improves the overall quality of care. Results are seen by measuring every aspect of a patient's movement through real-time reports and dashboards which provide actionable data for better clinical and operational business decisions.

Here is how Central Logic Transfer Center has helped health systems thrive:

$16 Million
in Contribution Margin Generated in the First Year

20,000
Patient Transfers Processed in First Year of Implementation

20% Increase
in Transfer Growth in the First Year

$8,000
Average Contribution Margin per Patient Transfer

25%
Reduction in Patient Leakage

Recaptures an average of 125+ staff hours per month

Patient Flow Challenges and the Central Logic Transfer Center™ Solution

Operational Challenges	Central Logic Transfer Center™ Solution
Hospital has capacity issues	Through visibility, hospitals and healthcare systems are able to handle greater volumes of patient admission and transfers, decreasing patient leakage
Hospital has no common entry point, unable to track patients efficiently.	Proven abilities to measure every aspect of a patient's movement and provides hospital staff with reporting
Lack the reporting needed to operate the transfer center effectivity and efficiently	Provides robust data analytics allowing for better real-time decision making and increased staff efficiency
Maintaining scheduling manual is consuming too many staff hours per month.	Scheduling information for an entire hospital is entered only once and, when changes occur, they are immediately viewable to any users of the system
Different roles within the hospital need visibility to different information	Visuals are designed to address the needs of various audiences from the c-suite to the end user
No access to true real-time data	Data captured, rapidly normalized, stored and structured, facilitating the translating data into meaningful action-oriented information
All communication needs to be HIPPA compliant	Communications engine handles all pages, emails, and text messages with data encryption and full transmission security, ensuring HIPAA compliance
