Conference@Net

CONTENT

Conference@Net

Conference@Net is perfect for organizing and managing events and conferences. It is innovative solution integrated with social networks, available on gesture controlled devices.

Conference@Net is:
- Intuitive, easy to use
- Everything is clear and visible at one glance
- Ideal solution for small, medium and large events, trainings, seminars, conferences.

The advantages of using Conference@Net

The administrative interface is simple, intuitive and easy to use and can be used on standard PC, tablets and smart phones, which enables to the organizers not only to have information in real time, but also change of the content on-site, approval of new registration of participants, results of polls, statistics of visits and the number of participants in each lecture.

FOR ORGANIZERS

Some of the characteristics are:
- Custom made – design can be according to corporate guidelines and book of standards
- Easy management on all levels of organization and process
- One person can do it all
- Easy to delegate to other admins and to supervise
- Filters for various registration types (press, participant etc.)
- Drag and drop – management of content and timeline
- Real time polls and evaluations
- Dashboard
- Year after year, everything is on one place
- Can be available - closed for one group /community or publicly open
- Templates and texts of messages can be prepared in advance and will be send by calendar and determinated time
- Vouchers
- Insertion of existing database (excel) for easy registration
- Laptop, tablet, smartphones
- Easy management of content
- Distribution of digital content
- Polls and statistics
- Pipeline, schedule

Content management system (CMS)

Quick and easy publication of content of exhibitions / events / workshops / trainings / conferences on the web and all mobile devices and in multiple languages. All changes to the content, layout, logistics information are automatically, in real time, updated on all platforms without the need for manual adjustment.

Access control and distribution of digital content: documents, presentations, videos, live streaming, publication of recorded lectures / presentations, monitoring and analysis of access of participants to content.

The promotion of lecturers (titles, images, institutions, curriculum vitae) and their automatic connection with the contents.

Closed communication or open communication through social networks (linking content with comments and / or moderated discussions).

Depending of exhibitions / events / workshops / trainings / conferences it can be organized as one track or several parallel track.

Polls – according to needs the questioner can be adopted for every occasion. All statistics and poll data are available in real time.

Akos Deliága
Hewlett-Packard Central and Eastern Europe

Ákos joined HP in September 2007 as graduate trainee in the Technology Services department. In September 2008 he was promoted to be the Line of Business Manager of Mission Critical Services and Critical Facilities Services. In July 2011 Ákos was appointed to be the Business Development Lead at HP Singapore for Critical Facilities Services. He spent there almost 2 years gaining hands-on experience at many complex projects around data centers. Since April 2013 Ákos moved back to Hungary to accept the Business Development Lead position of Critical Facilities Services in the Central and Eastern Europe region. He holds deep technical knowledge about IT systems as well as mission critical mechanical and electrical systems. Ákos has been elected the third time to be deputy chairman of the Data Center and Cloud Workgroup in the Hungarian Association of ICT Companies (IVSZ).

Manage relationships with participants (CRM)

Management of the process of communication with the participants, from the initial information (save-the-date), to the registration fee payment, records of participation, online content rating, collection of feedback, reporting.

Simply management of multiple groups of participants (student, teacher, organizer, VIP, press, etc.), Creating "invitation-only" invitations with a simple "one-click" registration or use of vouchers.

Enabling networking among participants of the conference, closed group, analysis of the profile of participants and speakers, creating an internal address book.

Gamification of process of collecting feedback and engagement of participants.

Control and record entry of participants in certain areas / rooms via smartphones that are synchronized with a central location in real time.

Support for a number of the same or similar workshops or events

Once created content for one location can be copied to multiple locations and opportunities. For example, the first workshop was held in Split, the second in Belgrade, the third in Bucharest - the content and layout is either the same or very similar, but participants are different.

Support for the management of the existing base of participants

When a person logs on to an event / workshop / conference, his/her data remain in the system and can be used for the next event in a way that to him/her will be send a personalized invitation with the web address of already completed registration form with his/her data and it is enough to review the information and click the "Register" button to complete the registration.

Appearances at events / conferences organized by other (exhibition)

Creation of micro-events as part of other people's events / conferences by sending invitations with a program that company will present there. In agreement with the organizers (third party) invitations are sent to participate to register for lectures / workshops organized by company, the registration of interested in participants, sending reminders to participate, various notifications, collect feedback, profiling of participants (for future targeted communications) sharing of digital content as already described.

FOR PARTICIPANTS

Some of the characteristics are:
- Real time information
- Easy registration
- Can be present on premise or online
- Material available online
- Data and privacy protection
- Networking

Invited participants of events / workshop / conference by signing up via web portal and / or mobile applications are easily and quickly registered and their data is fully protected.

The user interface of the web portal is responsive and automatically adjusts the screen size from large desktop computers, to the smaller ones (managed by touch) on tablets and smartphones.

All information about the content and schedule of events are available in real time, with useful notification of upcoming activities (eg. "The introductory lecture begins in 15 minutes", "Do not forget to come to the after-party", "Complete the online questionnaire and win award "etc.).

The possibility of active participation in lectures - easily via online surveys/polls.

There are also available information about the logistics - how to reach the place where the event / workshop / conference takes place (maps, navigation to the location, accessible public transport, parking payments by SMS, weather, etc.).

Access to protected digital content: documents, presentations, videos, live streaming of content (e.g., for those who are unable to attend in person, as well as review of recorded content after the event / workshops / conferences).

mobilityday

Poštovani partneri,
Dragi prijatelji,

S ponosom Vam predstavljamo MobilityDay 2015 konferenciju koja se ove godine održava po deveti puta. MobilityDay konferencija je vodeća regionalna konferencija u području primjene mobilnih rješenja, novih tehnologija i njihove primjene u poslovanju, obrazovanju i svakodnevnom životu. Iz godine u godine donosi informacije o najnovijim trendovima u ovom segmentu u svijetu.

Pridružite nam se i ove godine na MobilityDay 2015 konferenciji koja se održava 24. rujna 2015. u Hotelu Antunović u Zagrebu.

Dodaj Mobility Day u kalendar

Pripremamo Vam mnogo zanimljivih sadržaja, tema i predavača te je sada pravo vrijeme da u svom kalendaru rezervirate 24. rujna 2015. za MobilityDay2015 konferenciju!

Redovito nas pratite putem http://mobilityday.com web stranice.

Veselimo se Vašem dolasku!

MobilityDay2015 tim

Dear partners,
Dear friends,

We proudly present MobilityDay 2015 conference that will be held for the ninth time this year. MobilityDay conference is the leading regional conference in the field of mobile solutions, new technologies and their applications in business, education and daily life. From year to year the conference brings information about the latest trends in this segment in the world.

MobilityDay 2015 conference this year will take place at the Hotel Antunović Zagreb on September 24th 2015.

Add Mobility Day to your calendar

We are preparing a lot of interesting content, topics and lecturers, and now is the right time to save the date September 24th 2015. in your calendar. It is MobilityDay2015 conference day!

Follow us via http://mobilityday.com website.

We look forward to seeing you!

MobilityDay2015 team

Location

Mobility Day Conference will be hosted by Hotel Antunović in Zagreb, Croatia.

As our hosts say for themselves – they are a modern hotel, a part of the Business center Antunović and they are an ideal venue for you and your business partners. In order to achieve goals that have been set up pretty high, they rely on their highly motivated and ambitious team ready to take up on new challenges. Successful congresses, conferences, meetings, presentations, various business and social events can be held at the attractive and air-conditioned congress centre. Also, there are other additional services you can get.
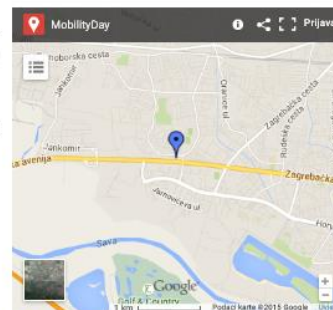

All this was one of the major reasons why the organisers of the Mobility Day conference have decided to host their conference at hotel Antunović in this year, as well.

Additional, our hosts like to put special emphasis that your stay will be enriched with creative and interesting gastro offerings of their restaurants, bars and bistros. Also, you will find great choice in their patisserie! A place for complete relaxation or recuperation can be found in their wellness centre where you can enjoy massage, sauna, body treatments and recreational programmes. Or, if you prefer, you can just relax and enjoy their swimming pool.

If you decide to take the panoramic elevator you will reach the place of surprises. It is Vertigo bar with a rotating dome enabling you to enjoy Zagreb and a beautiful panoramic view.

Cross-platform mobile applications development using Xamarin

There are several development tools offers in the market for developing multiplatform mobile applications. This lecture will present a comparison of these platforms, since it is crucial to choose the technology that will offer the best solution depending on the supported platforms, target users, and resources we have. One of the most popular platform's is Xamarin, which offers the possibility of using the programming language C# and knowledge of .NET platform for developing Windows Phone, Apple iOS and Android mobile applications. Come and listen about how you can use your existing knowledge and one code base for different mobile platforms, as well hear from speakers experience what must be specifically implemented for each platform, and what is a good practice for development of the most common types of mobile applications.
