

**The phone system for
modern business.**

A quick introduction.

Aircall is a 100% cloud based phone system. We help teams succeed and scale using a voice solution that is easy to use and connects with all their favorite business tools.

175+

Employees
in NYC and Paris

\$41 million

Venture funding:
Seed, Series A & Series B

100+ million

calls made
on Aircall

Intuitive, integrated, reliable.

Easy to set up
and scale

Beautiful and
intuitive UI

Connected to
all your tools

Proven call
quality

**“I like its simple design and user-friendly interface. I love the clarity
and how crisp the sound given to every call.”**

— G2Crowd Reviewer

Keep it simple.

Easy

No hardware needed.
Simple and beautiful UI for
admins and agents.

Fast

In less than 5 minutes
you can have your team
up and running.

Flexible

Access from anywhere. Add
numbers or users, or change
routing rules any time.

Global

Create a local phone
number in one of 100+
countries—instantly.

**" The setup and
configuration of Aircall
is a dream. It's so easy
to create new
numbers, set up IVRs,
and change people
around to different
teams if needed. "**

— Sara Tiffany, General
Manager at AirTorks

One-click integrations.

Hit the ground running

Integrate with your CRM, helpdesk, or homegrown system in under one minute.

Save time on every call

Automatically log details, including recording, comments, and tags,

Match your workflow

Easily set up integrations to match your workflow using CTI and open API.

ON THE ROAD TO 100 INTEGRATIONS

Developed your own internal CRM ?

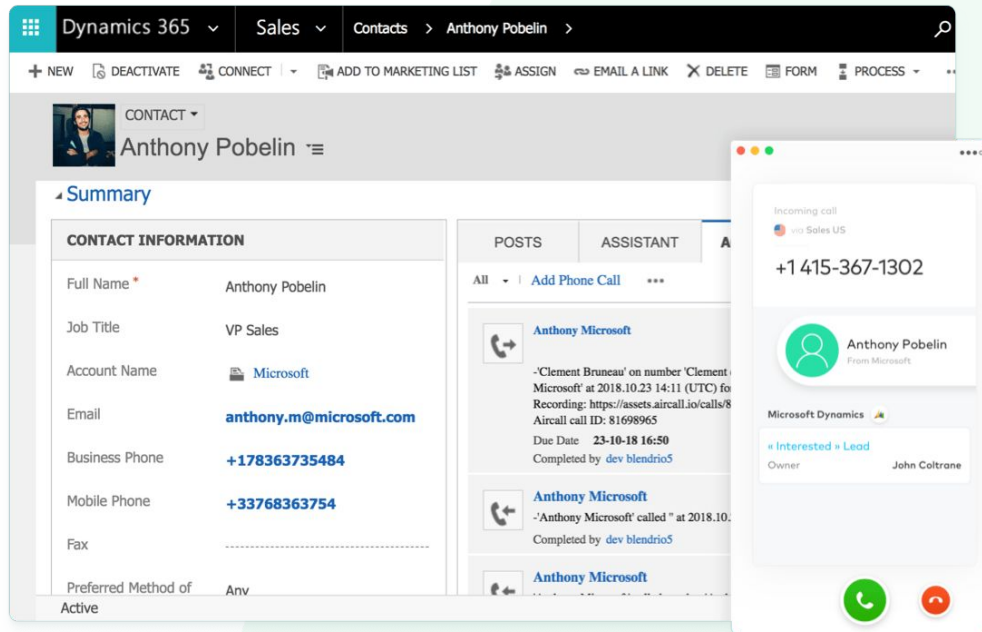

Integrate it with Aircall's API!

Aircall and Dynamics

Get caller details before you pick up the phone.

- Log call details in real time and set triggers for lead, contact or account creation.
- Cases and contacts are automatically created in Microsoft, saving time switching between applications and logging calls.

Aircall and Dynamics

Avoid manual entry and improve productivity.

- The caller's name, company, and contact history appear in Aircall as soon as the phone rings
- Account owners and customer service agents can provide quick and personalized service.
- Then link to Microsoft Dynamics with one click.

A strong foundation.

Cloud infrastructure

99.99%+ uptime
No hardware needed; no
maintenance required.

Carrier management

Multiple leading voice carriers
with dynamic switching to
avoid disruptions.

Security & compliance

Secured recordings and
encrypted data.
PCI and GDPR compliant.

Notification & troubleshooting

Auto in-app notification for
network, headset, and
infrastructure issues

**“The quality of calls
is superb. The line
sounds very
professional. Even
when our clients
are on mobile, the
call is clear.”**

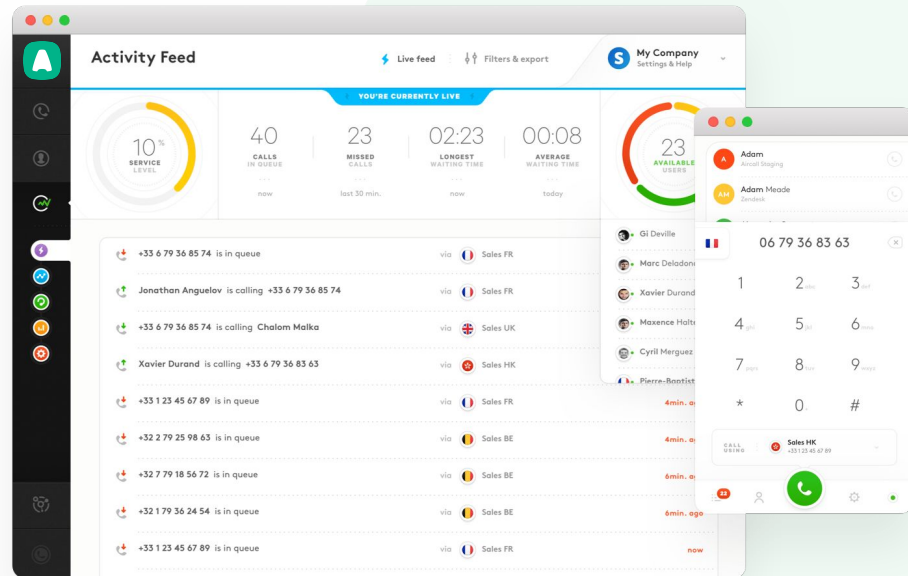

— G2Crowd Reviewer
