

All that your workforce needs at their finger tips

Andea eWorkin keeps factories moving smartly; your team is empowered by relevant info, they know what to do next, and how to do it. While in the background, Andea eWorkin collects rich data for analysis and process improvement.

Live metrics and tools to support quick and consistent decision making

Reduced operational downtimes and other productivity challenges

Be more competitive by running flexible and adaptive production systems

Empower People

Provide your staff with relevant info so they know what to do next and how to do it

Seamlessly collect rich/accurate data for analysis and process improvement

Streamline processes

Achieve Compliance

Automatic traceability data collection

Ensure brand integrity

Instant report generation

Maximize Efficiency

Track Performance, Quality, Availability, Tasks and Alert data on any machine - new or old

Provide insight on how to better utilize your assets

Production data you can trust with a solution deployable in days

Designed with you in mind

Andea eWorkin was designed along side our clients to streamline workflows, automate processes, and leverage the mobile technology

"With Andea eWorkin we have fewer errors, a streamlined workflow and user friendly analytics."

- Piotr Kaczak, Quality Manager, Woodward
