

\$0 Cost Implementation

What do you get?

Equip provides an online booking portal enabling 24x7 self-service for your customers which eliminates double bookings and admin overheads. The automated reminders to customers reduces property inaccessibility, while timely reminders to your team improves efficiency and 'no shows'. The offline capable mobile app provides your field-force with a powerful tool to capture information (notes, pictures and videos) on the job without the need to recapture the information later. The report creation and emailing can be automated, heavily reducing admin costs. Since this is a Microsoft product, it naturally works with Outlook, Excel, SharePoint, OneDrive and many other Microsoft products. This system allows innovation promoting a competitive advantage

Why?

- reduce no-shows
- eliminate double-bookings
- capture job info at the source
- track job info
- keep customers informed
- improve collaboration
- protect your info
- improve staff utilisation
- reduce staff frustrations

increased efficiencies

- easier data capture
- automated report generation

reduced costs

- less data recapturing
- less manual administration
