WHAT WE OFFER

Core HCM & Workforce Administration

Talent Acquisition

Performance Alignment

Talent Development

AI based HR Chat bot

Achieve Single Source of truth with strong HR foundation to address all your organization needs. A complete workforce administrative module to take care of all your workforce activities.

Adrenalin's Talent Acquisition helps organizations to get the right talent at the right time to support their business.Holistic Talent acquisition solution from planning to On Boarding

Adrenalin's Performance Management serves as a central online performance review tool. It empowers employees to manage their own performance, update goals and develop plans and encourage feedback

Adrenalin's Talent Development ensures that organizations manage their talent assets and mitigate the talent risks. Put in place a training plan and deliver sharply targeted training that upgrades key competencies required for business advantage, while reducing administrative overheads.

Adrenalin's AI & ML enabled Chat bot – Sara offers intuitive and hassle free HR operations. It minimizes the window of query solving. Employees can now raise HR related query and get a personalized information in real time. Acts as Monitoring & Alerting system.

WHAT OUR CUSTOMERS ARE SAYING

'We, BIESSE Group are a multinational leader in manufacturing CNC machines for Wood, Glass, and Stone & Plastic. We have been using Adrenalin since 2011 to automate the HR processes. Adrenalin's Shift Management module enables us to get real time insights on employee availability at any given point in time. We also use Leave Management, Attendance Management and Payroll to create a more strategic HR Department. Adrenalin's expertise support is an Ultimate. Adrenalin is more than a HR Software, it is a thrust that organization need to move forward. We are proud to be a part of Adrenalin Family as a customer.'

- M.B.Subramniam, Senior manager IT

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
