Paper is easy to
 use to take notes,
 but fails for recall.

Hundreds of apps
and authoring tools
are fine for taking
notes, but they
fail for recall.

Your photos,
documents, videos,
and voice recordings
are scattered and
unorganized.

CRM is great for
keeping Companies,
People and Deals
organized, but it
fails for note taking.

Your level of success
will improve and you'll be
less stressed with Aloe.
