

The personalization of bank forms can be so easy

Let your bank forms personalized efficiently and cost-effectively! With our own developed web-to-print solution succeeds you quickly and easily.

With the intuitive operation, you can find your way from the first minute and effortlessly go through the ordering process.

Our system is constantly evolving and meets the latest development and safety standards. Your data is safely stored in our ISO 27001 certified data center.

It's so easy

Select the required document and order quantity in the online shop. With the activation of the customer data, the input fields will be automatically filled out. Confirm the information to get your print preview. Now click on "Order". Finished!

Your advantages at a glance

- Intuitive and fast ordering process
- No typos and less effort by getting the current customer data
- Use of the banking app: With our solution you receive the vouchers with a QR code without additional costs
- Variable reimbursement: Invoicing directly to the customer or to the bank
- Just-in-time production
- Shipping with the delivery note in the CI of your bank to the branch office or directly to the customer
- Revision-safe order archive with order and shipment tracking
- Assignment of user rights for the classification of possible uses
- No contract or minimum order quantities - we count on your satisfaction
- Topicality of the official guidelines for payment forms and automatic adjustments

Of course, our bank forms are produced on the base of the guidelines of the uniform payment transfer forms, which were passed by the central associations of the German banking industry and the German Federal Bank.

Our efficient workflow tools and services make your work easier

Our system is composed of different modules and is constantly being developed. Below you will find further information about the individual components.

The end customer shop

In future, bank customers will be able to personally personalize and order payment orders via the end customer shop.

That's how it works:

Together with you, we set up an online shop for the personalization of bank forms. After the release, include the link to the shop on your website. This way, the customer is automatically routed to the online shop.

Your advantages at a glance

- Your offer to your customers is a high quality service and benefit from a huge saving effect. Because you don't have to do any effort for it
- You decide which document variants you provide in the shop
- Your CI will be respected, all supporting documents will be delivered with the logo of your bank
- The security and privacy are still guaranteed
- The check-number-control checks the account number for correctness. This ensures that only your customers can order receipts
- The payment methods PayDirekt, Giro pay, direct debit and credit card are available

The Permission Center

More security during the ordering process

Do you like to play safe while you're ordering personalized bank forms? Then use our permission center! Here you can easily define one-level or multi-level approval processes in the Web-to-Print Portal. This ensures that the responsible employees only validly issue orders after approval. That ensures maximum safety!

Your advantages at a glance

- More security: Four eyes see more than two. The approval process helps you to avoid incorrect orders.
- Multi-level approvals: Would you like to have your order process released in two stages? No problem! Because in the Release-Center, you have the option to deposit both the supervisor and the administrator.
- Everything is documented: Thanks to the integrated documentation, you can always track what was released when and by whom.

The OSPlus interface

For more comfort and security - for savings banks

Would you like to edit your forms even easier and safer? This works with the connection to OSPlus via Crednet: Just enter the account number in the respective form and the account holder and the address are automatically filled in advance. This saves you a great deal of time and reduces the risk of incorrect data entry to a minimum.

Your advantages at a glance

- More convenience: With the dynamic interface to OSPlus, you can access all customer and address data. Always up to date and secure.

- Faster than ever: An order process only takes a few seconds - just enter the account number. Finished! All other data will be filled automatically.
- Save costs: Misprints due to typos or old address data are now a thing of the past. This saves you time and money.

The IBAN generator

The IBAN generator integrated in the ordering process automatically translates the account number into the IBAN format. This additionally checks whether the IBAN displayed in the document actually exists. This way, incorrect information is easily avoided!

The audit-proof order archive

With the order archive your audit-proof is so easy. Selected persons have access to an audit-proof overview of all orders placed - with retroactive effect over three years. The data can be evaluated quickly and accurately by means of an Excel export. In addition, each user receives a quick overview of the last orders placed, as well as insight into the current processing status.

The check number administration

For simple and error-free administration of the check number cycles, a specially developed function is available for authorized users. The numbers are first defined and automatically assigned when placing an order. This eliminates double number assignment, regardless of whether the SEPA check variants have been assigned a single or a differentiated group.

Our billing service

Benefit from our unique and flexible billing service

Orders are shipped with a delivery note (including a receipt) on behalf of the bank. At the end of the month, you will receive a collective invoice for all orders. At the beginning of the following month, we transfer the customer debits via EBICS to the revenue account specified by you. Alternatively, an XML file can be made available, by means of which the costs can be charged to the customer. The entire settlement process takes place on behalf of the bank, so the bank continues to act as a service provider to the client.

Your benefits at a glance:

- More comfort: Your accounting is relieved and does not have to worry about billing
- Clearly: with the monthly evaluation you have everything in view and can use them for evaluations

Our just-in-time production

Benefit from our just-in-time production

Order small quantities for your customers before 14:00 clock, then your order is placed on the same day in the shipping!

Blanks no longer need to be stored in your bank because your customer usually receives the goods the very next day.

What are small quantities?

Payment slips and transfers can be ordered from 10 pieces.

SEPA checks can be purchased from a minimum order quantity of 25 pieces.

Small orders include all orders under 1000 pieces.
