

CitiusTech: BI-Clinical on Microsoft Azure

Leveraging Next-gen Technology for Healthcare BI & Analytics

Gold Cloud Platform
Gold Application Integration
Gold Application Development
Gold ISV
Gold Datacenter

BI-Clinical, CitiusTech's ONC and NCQA certified BI & analytics platform provides an integrated approach to address the healthcare organization's most critical quality reporting and decision support needs. The solution offers hundreds of configurable apps and a high-performance rules engine that enables organizations to configure and deploy custom quality measures based on their business requirements. BI-Clinical leverages Microsoft stack with SQL server for backend and Power BI for visualization. The solution can be hosted seamlessly on Azure with high availability.

Accelerated Deployment

- 5,000+ deployments
- Prebuilt adapters for standards-based ingestion (FHIR, HL7, CCDA, etc.)

Compliance

- Accuracy of submissions and traceability for audits
- 900+ pre-built rules enabling compliance across MIPS, ACO, HEDIS, MU, STAR, HCC, etc.

Comprehensiveness

- One stop shop solution for value-based performance management
- Complete coverage for major quality initiatives

Speed of Business

- Real-time and batch processing leveraging fastest rules engine
- Flexible reporting periods and platform scalability up to 100M lives

Proactiveness

- Ability to monitor and proactively close gaps
- Dashboards and workflows tailored to business

Modular Architecture: Independent ingestion and processing layers and prebuilt measure sets to support clinical, financial and operational KPIs as needed

BIC-RMM (Rules Management Module)
Author, test and run custom rules, clinical alerts and cohorts with full auditability - up to 40% faster go-live for new rules

Unified Healthcare BI Solution for clinical, financial and operational reporting needs with seamless connectivity on SQL data warehouse

BIC-Audit (Auditing Module) to support all types of audits (CMS, NCQA, organizational, contractual, etc.) with real-time execution and assessment of compliance scores for validation

Key Use Cases

- Quality and cost analytics
- VBP and population health
- Closing gaps in care
- Provider engagement and care coordination
- Regulatory reporting and submission

Quality Programs

“Out of the box” support for HEDIS, MIPS / MACRA, ACO, MU EP, MU EH, HCC, Star, Multiple Medicaid Programs
