CARBON

Bonds your core elements together!

Carbon combines two essential solutions that any organization look for. Whenever there is an Active Directory domain in your datacenter; the need to fulfill repetitive tasks alongside with having insights about the environment arise. With Carbon you can delegate these tasks to your non-IT users; using a *multi-language self-services customized* portal that handles the automation of day-to-day operational requests in addition to giving your IT personnel the executives & deep monitoring abilities to maintain the highest availability and performance levels for your hosted services.
