4 BENEFITS FOR IT

− 360° SUPERVISION AND MONITORING −

◇ Real-time monitoring of the platform's health (infrastructure and software)

◇ Real-time alarming on functional and technical incidents (platform and application partners)

◇ Storage of base elastic search logs for diagnostics and instant reporting (anomalies, performance)

CLOUD TO CLOUD

◇ Natively allows the production of exchanges between systems (IoT, IA, Big Data, BDD, CRM/ERP) hosted on different cloud providers

◇ Quickly connect and disconnect business innovations / Re-use

SECURITY

◇ Secured communication channel between the IS on prem and the cloud platform

◇ No modification of technical parameters / no installation

◇ Simple version management of all flow elements with the possibility of rollback

BUDGET

◇ Controlled integration budgets, implementation of 10 flows in 6 weeks

◇ Software as a service : managed platform and 3-year budget visibility
