Unified Classroom™
Learning

EXPAND STUDENT LEARNING OPPORTUNITIES

Part of the **award-winning** PowerSchool Unified Classroom™ solution, **Unified Classroom Learning is an** integrated, easy-to-use, cloud-based **learning management and classroom collaboration application.**

Focus on each student with easy-to-use technology that connects the classroom and home. Boost student success with a 360-degree view of performance in a unified software solution that combines assessment, gradebook, learning, and special education products.

Simplify Instruction

Teachers can create embedded, multimedia-rich lessons with a few simple clicks, and stay connected to student and classroom trends using a variety of assessments. Throughout the year, teachers can save valuable time with a paperless workflow for collecting, grading, and returning assignments.
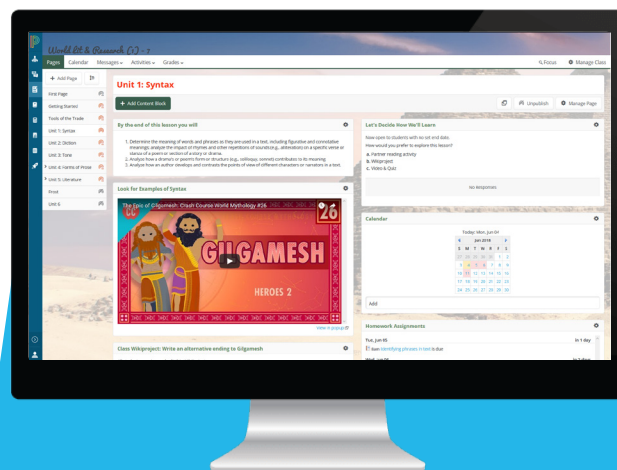

Engage Students

Teachers can integrate personalized and project-based learning with wiki projects, an online space for students to create, communicate, and collaborate with each other. Students decide how to structure their space and demonstrate their knowledge using a suite of multimedia tools and embed web apps from the web library.
Tailor Learning for Each Student

With customizable, interactive lessons, teachers can scaffold instruction in highly visual, meaningful contexts to engage all learners. Inspire students to learn and achieve at their own pace with lessons that can be completed from any device. With e-portfolios, students have the opportunity to collect and showcase their achievements.

> "Unified Classroom Learning really makes it easy for our teachers to **embrace cloud-based learning, flip their lessons, and promote paperless classrooms.** With little training, teachers are able to **develop classes and share resources with their students and parents.** We now have our principals using Unified Classroom Learning communication with staff, and they absolutely love it!"

JENITH MISHNE
Director of Educational Technology,
Newport-Mesa Unified School District, CA

Customers interviewed reported teachers reduced time spent managing instruction by **more than 10%.**

10%

Class Pages

Easily build class pages in minutes as a central place for all lessons, activities, and projects, and create unique learning spaces that meet the diverse needs of K-12 students.
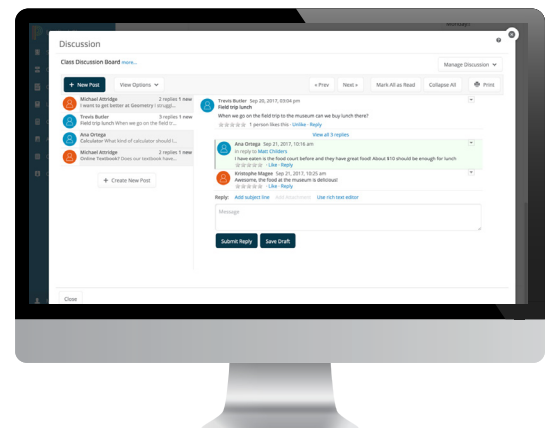

Assignments

Create embedded, engaging lessons with a few simple clicks to deliver lively instruction that's tailored to the needs of each student. Grade electronically and monitor how students are progressing toward standards mastery—all in a snap!

Activities

Inspire and boost student learning with engaging polls, discussions, and videos. Integrate personalized and project-based learning with wiki projects, an online space for students to create, communicate, and collaborate with each other. Activities include assessments, discussions, polls, wikiprojects, and more.

Grades

Electronically collect, annotate, and grade student work. Integrated with Unified Classroom, grading provides smooth workflow without duplicate data entry.

Help students get more out of education with Unified Classroom™ Learning today!
