The CAD of the Future

**Call-Takers**

Benefit from the world-wide only ProQA Titanium integration, best-in-class tactical mapping with supplemental location sources, and situational awareness tools such as two-way texting with AI-powered real-time language translation.

**Dispatchers**

Enjoy RapidDeploy’s proprietary Response Plan Engine, highly configurable Tactical Grids and Boards, as well as dozens of unique features like dynamic ETA predictions based on real-time traffic data.

**Responders**

Responders in the field are always connected and tracked using Advanced Telematics, Mobile Apps for Android & iOS; as well as, web-based MDC/MDT features. These features allows agencies to improve officer safety and situational awareness. With Samsung’s DeX platform, you can turn any responsive vehicle into a mobile command post.
“It’s not a question of if, it’s a question of when all 9-1-1 centers will migrate to the cloud.”

- Steven Raucher, RapidDeploy, CEO

**Why RapidDeploy**

- **Ease of Deployment**
  - Easy to deploy and fast to configure
  - No expensive hardware
  - No multi-year implementation
  - Always up-to-date

- **Cost of Ownership**
  - Affordable for agencies of all sizes
  - No more expensive hardware and on-premise infrastructure that breaks the bank
  - Democratize 9-1-1 centers with full features and functionality regardless the size of the agency
  - Ability to leverage smartphones and tablets to augment existing responder mobile hardware

- **Reliability and Security**
  - Highly resilient and secure
  - Government-level security
  - No more downtime for updates
  - No more reliance on single point of failure and vulnerable infrastructure
  - Hosted in multiple georedundant data centers in the US for optimal availability
  - Never needing scheduled downtime for patches and interface fees

- **Features and Functionality**
  - Future-Ready features and unlimited integrations
  - Realize the benefits of NG9-1-1 today
  - Powered at the core by Esri GIS leveraging authoritative data
  - Live data feeds and tactical mapping to deliver situational awareness
  - Two-Way text messaging with AI-powered language translation
  - Deliver complete mobility for all first responders
  - Data-driven with Business Intelligence (BI) & Analytics
