

The challenges we face

Performance

- Unstable Results
- Overstocking and shortages
- Unsatisfied customers
- Supply chain under pressure

Process & tools

- Average approach
- Not using Big Data
- No « future-proof »

Team

- Decisions based on experience, not facts.
- Reacting instead of acting
- Submerged

Our Solution

VEKIA is a SaaS solution specialized in Stock Management optimisation and Replenishment.

It's the Artificial Intelligence developed by vekia's team that give our clients' Supply Chain all the accuracy it needs.

We collect, we gather and we clean your Data to make it perfectly relevant for your Forecasts. It's the quality of the data we exchange with our Customers that determines the success of our relation.

Economic

Enhances profitability and avoids having too much stock.

Ecological

Significantly reduces carbon footprint and avoids waste.

Ergonomic

Improves working conditions and is perfectly implemented in managing Supply Chain.
