# Digital Asset Management by FotoWare – Built on Microsoft Azure – Offers Flexible Control Over Your Videos, Images, Documents and Graphics

MICROSOFT AZURE APP BUILDER PROFILE: FotoWare

FotoWare offers digital asset management solutions to keep track of ALL your videos, images, graphics and documents. We help you easily find, use, organize, modify, move, share and manage your assets from a single point of entry. Our solutions are used by medium and large organizations, big news and media, museums and public services in 42 countries.

WHAT WE OFFER

Manage your files

Our solutions keep track of ALL your videos, images, graphics and documents. Easily find, use, organize, modify, move and manage your assets from a single point of entry. Empower your colleagues and let them easily find what they're looking for. This will save you a lot of time.

Use it anywhere

Access your content on any device and from within your favorite applications, such as Microsoft Word or PowerPoint. Quickly solve tasks while on the move, publish files and approve content for further use. Be assured your files are safe, and bring them with you wherever you go.

Automate, Collaborate

Use custom actions to get things done quickly, predefine important workflows or collaborate with your co-workers. Make your day easier by automating repetitive tasks. Define user access to stay safe, and control which users are allowed to find, use and share what files.

Easy to get started

With our application running on the Microsoft Azure platform, you can get started using our solution within minutes. We have included a 30-day free trial in our offer, so you can start when you want. Whenever you have questions, feel free to reach out so we can talk.

WHAT OUR CUSTOMERS ARE SAYING

"Our system from FotoWare is now available 365 days a year so that police officers can review evidential images at any time." – Kevin Clark, Imaging Unit Manager, North Wales Police

Microsoft | Go-To-Market Services

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
