HITS IoT Smart Surveillance Solution

Internet of Things promises to reshape the entire market with all its industries.
From smart access control solutions to smart surveillance applications, the IoT is increasingly touching every facet of our professional lives through its unmatched power of connectivity.

HITS smart IoT solutions incorporates a variety of sensors and devices interconnected to produce a wide range of innovative futuristic possibilities and a real added value for your organization, to make all your dreams come true.

HITS Smart IoT solutions family include bio-metric multi identification, smart IoT access control, smart IoT surveillance solutions… and more. Those solutions are designed to secure people in business buildings, homes, countries or even as individuals.

HITS IoT solutions are beneficial for:

- Protecting people, business buildings and assets.
- Improving the quality of life.
- Maximizing productivity.
- Boosting the level customer satisfaction.
- Data correlation analysis, to identify and match people.

HITS IoT Solutions are fixing the most complex situations in any business industry

Overview

HITS Smart IoT smart Surveillance solution is about connecting smart surveillance cameras passively or over the cloud.
Which also can be hanged in public areas, business buildings, education compasses, airports, banks, and more.

As a result these smart cameras are able to:
Identify, track, monitor all people and objects in this place.
Above all with an innovative automation to improve public safety and reduce security risks.

Moreover, HITS Smart IoT Surveillance solution has a relational database also with data correlation feature.

Most importantly It can generate meaningful information about people whether they are: employees, visitors, suppliers, or even unknown in seconds.

HITS IoT Smart Surveillance Solution Features

- Identify people & objects.
- Passive capturing.
- Heat Map & Sentiment Analysis.
- Measure customers' feelings and satisfaction.
- Cloud storage.
- Data correlation analysis.
- Ability to search by Person, Time, Zone.
- Finally visualized dashboards and analytics over Microsoft Power BI.
