

# kira

Discover  
the intranet  
that's built  
for a better  
employee  
experience.

kira365.com

**Kira is an intranet that's satisfying to use and empowers your colleagues to get more done.**

Its straightforward interface lets employees communicate and collaborate better.

And it's backed by powerful yet intuitive publishing tools that content creators will love.

**Why waste time reinventing the wheel when you could transform your organisation for the better?**

We've boiled down our experience of creating intranets for private, public and third sector organisations into a platform that enables real digital transformation.

That's not just a buzzword – our customers are actually experiencing it.

**Kira** builds on the capabilities of Office 365, turning it into a rich, satisfying digital workplace that your colleagues will love to use.

It already features everything you'd expect – news articles, sites, pages, blogs, events, social media integration. Add in streaming video, personalised homepages, sentiment analysis and instant, metadata-driven search, and you start to see why our customers love Kira.

And, because we keep it exceptionally closely-aligned to Microsoft's roadmap and vision, Kira integrates completely seamlessly with the wider Office 365 experience.

**TESCO** Bank

**Scottish  
Water**  
Trusted to serve Scotland

Great Ormond Street  
Hospital for Children  
NHS Foundation Trust

## Find what you need faster

### Employee experience

We pour our people change expertise into Kira to ensure a great experience and high user adoption.

### Social intranet

Facilitate genuine communication between your colleagues - not just one-way, top-down information.

### Personalised content

Each employee's homepage is automatically tailored based on what Kira knows about them.

## Kira ♥ metadata

Adding metadata is easy. Kira uses it to personalise pages and surface key information across the intranet.

### AI-powered search

Search with underlying artificial intelligence lets you discover pages, files and people almost instantly.

### Unified navigation

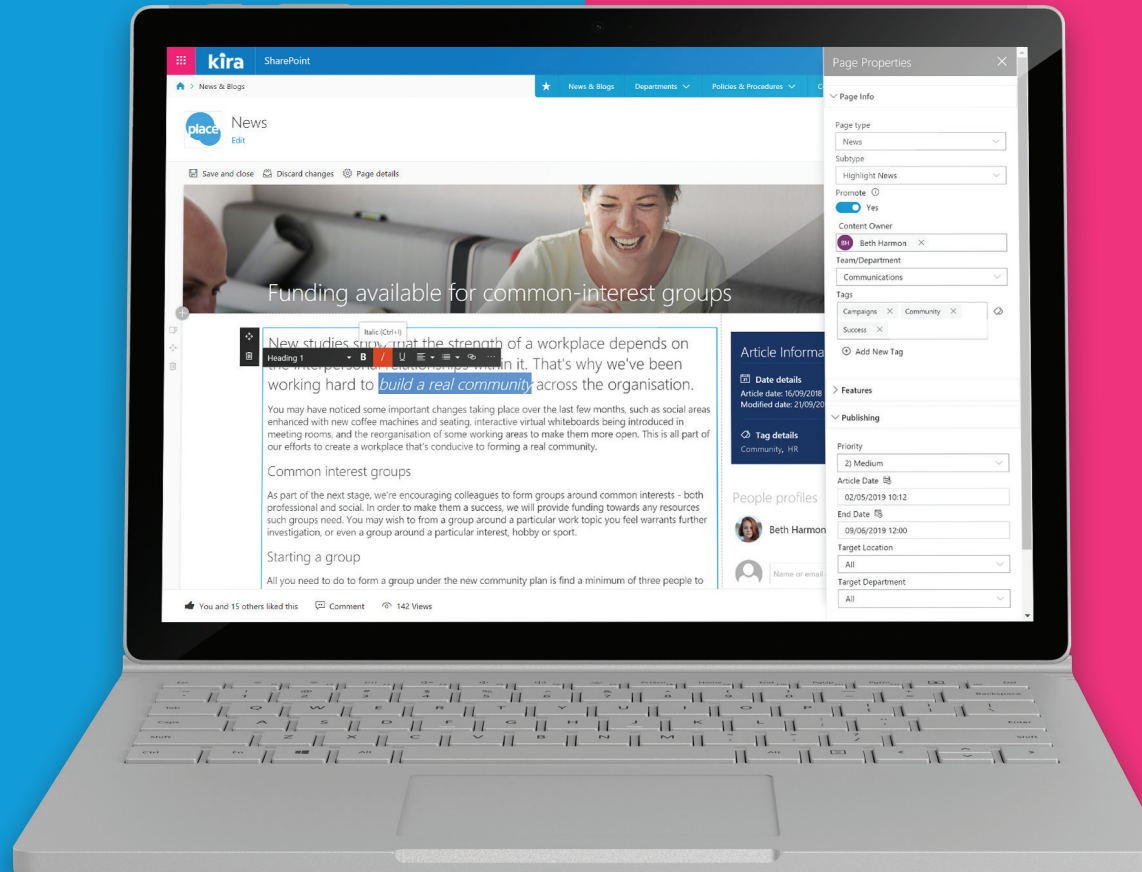

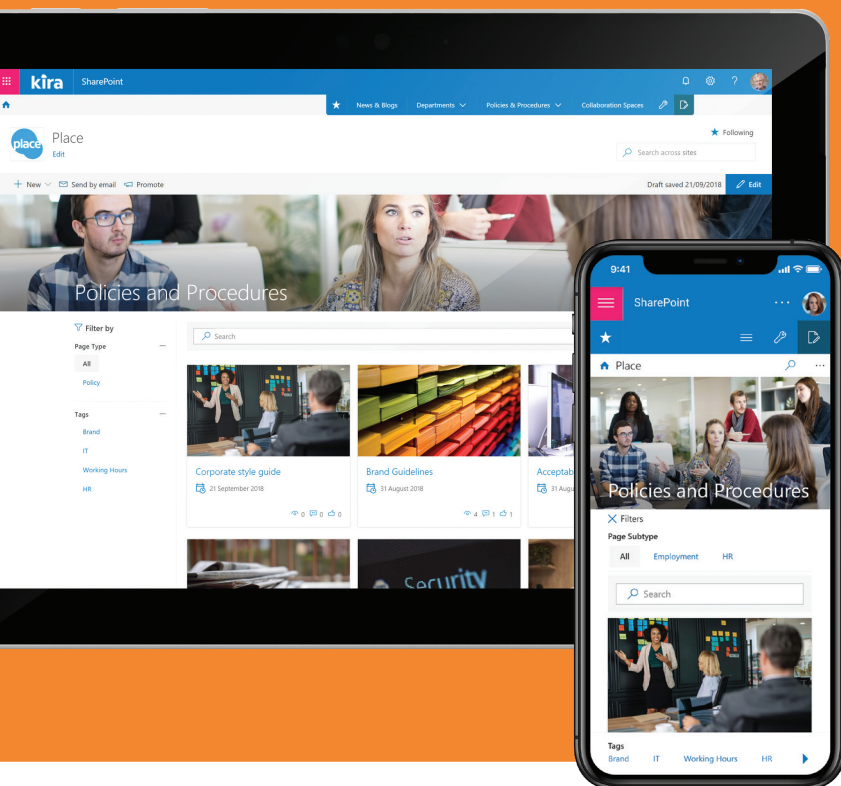

Kira supports multiple sites for sub-brands, with a common navigation bar unifying your intranet.

### Finding your way

Quickly create menus that match your employees' mental models of your organisation.

Help your staff find pages of a particular type in seconds with Kira's **document centre** component. Results bubble to the top as you enter your search term, and can be filtered further using tags (or any metadata you like).

Kira's **analytics dashboard** features sentiment analysis and data broken down by department and location. So you know who's looking at your content and how they feel about it – not just how many pageviews it has.

### Deployed in hours

We can deploy a standard Kira installation to your Office 365 tenant in just a few short hours.

### Mobile-first

Kira is designed with mobile in mind, giving your staff a great experience however they access your intranet.

### Reactive and accessible

Kira and SharePoint Online work together to support assistive technologies for better accessibility.

## Visual page editor

What you see is what you get! Lay out content with ease with Kira's drag-and-drop editing experience.

### Designed for Office 365

We're fanatical about keeping Kira closely-aligned with Microsoft's vision and roadmap for Office 365.

### Subscriber benefits

Updates to the latest version are included in your subscription, so you're always on the cutting edge.

### Getting better all the time

We're constantly making Kira better, based on customer feedback and our team's own innovation.

## Know what your staff are thinking

# Meet the people behind Kira

**Kira** is designed and developed by CompanyNet. We're an independent software solutions company with more than 20 years' experience.

(We were building collaboration sites when SharePoint was just a glimmer in Bill Gates's eye.)

We help organisations drive more value out of Office 365 – through products like Kira, and the expertise of our professional services and managed services teams.

Our starting point is always people, not technology, because there's no point in building something if nobody wants to use it.

We've used our extensive people change experience to design Kira for high user adoption. It's backed by our own tried-and-tested frameworks that will help ensure your intranet is a huge success.

So whether you're:

- looking for a new intranet
  - embarking on a digital transformation project
  - or just need advice on getting more out of Office 365
- ...we're always happy to talk through how we can help.
