The fast and easy way to manage a modern workplace, built for businesses

Challenges	Ideal Solution	SpinPanel
Remote Desktop Services and VDI solutions require a significant overhead	Easy to configure, multi-tenant and centralized deployment	Configured in minutes, multi-tenant
The management infrastructure for a modern workplace is complex	Easy to use for system administrators and end-users	No supporting infrastructure or configuration on the end-user's device required
Devices require pre-deployment or customized agents for management	Should work out-of-the-box without configuration	Works out-of-the-box and does not require custom agents per organization or user
The modern workplace does not support the same feature set as on-premises solution	Provide a rich feature set equal to traditional domain joined devices	The same features and rich user experience as an on-premises workspace solution

SpinPanel

SpinPanel WorkSpace integrates with Microsoft 365 Enterprise to transform your Windows 10 device instantly into a modern workspace. Fast and easy, without compromising on management, security and user experience.
