- Agentless
- Simple, on-site monitoring box deployment
- SaaS means no patching/updates for you

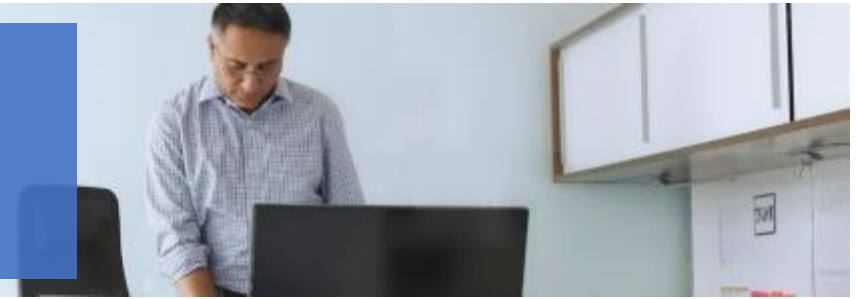

Optional: Value Title

Use the 4th only if it is critical to your story

- 4th is optional

A packaged solution providing IT weather and automatized reporting

Coservit ServiceNav + Microsoft Azure

Joint Microsoft and Coservit value proposition – Remove reliance on multiple solutions with ServiceNav on Azure: a scalable, multi-tenant SaaS IT service monitoring solution underpinned by the performance and availability of Microsoft Azure PaaS.

Solution Alignment

Scalable

Scale up and out at the speed of IT
No longer constrained by the capacity of on-premise infrastructure or capital budgets. Additional resources are ready when you are with Azure.

Highly Available

Mission-critical level infrastructure availability 'as standard'
ServiceNav running on Azure PaaS means availability and performance are 'baked in'

Rapid Time to value

ServiceNav is ready and waiting for you NOW!
Onboard customers quickly and easily onto the platform that's already up and running. No project delays securing, and configuring hardware and software.
