Quadrotech

Migrate users quickly and safely to Exchange and Office 365 with Mailbox Shuttle

Email is a mission-critical service, so it's important that when you decide to migrate your live mail, the solution you choose minimizes end user disruption, and uses intelligent automation to maintain compliance and business continuity.

Introducing Quadrotech Mailbox Shuttle

Mailbox Shuttle ensures continuous user email access, provides full checks, monitoring and reports, and is readily scalable. Chain of Custody and compliance best practice is followed at all times, and a full audit trail following Microsoft's best practices is maintained at every step of the migration process.

Migrating to Office 365?

Quadrotech is the only migration vendor with a single suite of proven applications for migrating the entire email ecosystem.

Mailbox Shuttle can be used as an orchestration tool for the entire integrated migration framework, covering live mail, email archives, PST Files and Public Folders.

Mailbox Shuttle cloud

Mailbox Shuttle cloud gets you migrating in minutes. Its dedicated control module manages the migration without needing to deploy on-premises hardware. All that is required on-premises is to install a single set of modules.

Sync'n'Switch technology

Mailbox Shuttle's proprietary Sync'n'Switch technology uncouples data synchronization from user migration, guaranteeing that users are not interrupted while their email is migrated.

This enables seamless migration across Active Directory (AD) forests, helps consolidate email across organizational boundaries, and enables email integration following mergers and acquisitions.

Integrated live mailbox and archive migration

- Migrating to Office 365? Use Mailbox Shuttle and Archive Shuttle together. A single schedule preserves dependencies between live mail and archive with no user interruption.

- Enterprises typically have a connected and dependent infrastructure in which live mailboxes, public folders, archives, and offline PST files co-exist. Quadrotech can migrate it all.
