

The cloud suite for managing Human Resources, Learning and HR Safety

Together is the cloud solution **entirely** developed by [SkyLab Italia](#) in order to meet all the needs linked to HR management.

Together meets all the organizational needs aligning HR and business strategies. All main processes are integrated in one unique system.

Built on a solid set of core HR processes (personnel data management, company organization, job profile) and powerful functionalities (datawarehouse, BI, collaboration, gamification), Together can be implemented by module based on customer strategy.

- 360° approach to handle top management requests

Talent Management as others, but Together

The first ERP for Learning

Integrated, to protect employees and employers

We have appreciated and chosen Together Jazz solution, precisely because of the attention paid to the demand management processes and self-service. The relationship of "work complicity" with the vendor, the fact that each of the parties entered the dynamics of the other has allowed us to achieve an excellent result. Working together we have built the path of evolution that has led us today to have a tool fully integrated with our legacy systems.

Fater SpA – Roberta Di Brigida – Learning & Development Manager
