

THINGTRAX CONNECTED WORKER

BOOST SAFETY AND PRODUCTIVITY IN THE WORKPLACE

How connected worker will improve your business

Tight budgets, intensifying regulations, a widening skills gap; it has never been harder to help your industrial workforce thrive. At ThingTrax, we created Connected Worker to serve industrial employees around the world. It simplifies daily challenges to get the job done while ensuring safety of your workers.

ThingTrax Connected Worker is a state of the art, easy to setup, location-based system, which helps you enhance your employee's safety and increase efficiency on the production floor.

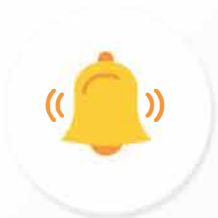

Minimize Safety Incidents

Connected hardware and software make it easy to track the location and safety status of your workers in real-time. You can be sure that they are protected during their shift and in case of an incident, a rapid response is received. So, you can have peace of mind knowing that your business and employees are in good hands

Promote Preventive Behaviour

Connected Worker Solution come in several varieties allowing you to monitor the safety and productivity of a single worker or an entire plant. This solution improves productivity, reduces cost and downtime

Anywhere, Anytime Real-time Alerts

Data from each connected worker is viewed in real-time such as the location, working hours, productivity levels, compliance and man-down status. All the information is sent instantly to a map-based display or mobile device which can be viewed from a remote location

Streamline Safety Procedures

Real-time monitoring sends notifications to employees alerting them to avoid or respond to an incident. This minimizes the chance of injury to other workers and keeps them safe from harm

Historical Data Insights

Connected Worker provides a complete picture of the company's historical data including skills matrix, labour efficiency, accurate costs of each product and assembly.

Presence Automation

Automating events based on presence of labour or equipments helps gather critical data from factory shop floor to achieve efficiency and reduce cost.
