What does Synergy do?

Synergy solves three key challenges for built environment design professionals.

Project management

Organise workflow with phases, stages, and tasks. Manage project delivery with resource planning, contacts and central project information.

- Work breakdown structure
- Document management
- Outlook plugin
- Resource planning
- Transmittals

Project collaboration

Work with your entire project team online with project portals, chats and document sharing. Securely invite third party project members.

- Project portals
- Shared documents
- Cloud storage
- Project chat
- Connected apps

Project accounting

Understand profitability for your business, projects, clients and staff. Use forecasting to plan your future resourcing and transactions.

- Forecasting
- Timesheets
- Rates and costs
- Project budgets
- Invoices

Synergy — key features

Designed and built for architects and engineers.

Outlook add-in
The Synergy outlook add-in lets you file emails straight from Outlook to project folders in Synergy.

Documents
Central cloud document management for files, images and emails, with security, version control and sharing.

Project portal
Collaborate on projects via a secure, online portal. Track file viewing and manage communications.

Projects
Manage project progress with a work breakdown structure, segment projects into stages, tasks and fee types.

Timesheets
Track time on project tasks with timesheets, timers and expense entry for accurate project accounting.

Forecasting
Forecast revenue and estimate capacity with a drag-and-drop Gantt chart for confirmed and proposed projects.

Try Synergy free for 30 days — no credit card required.

What our customers say...

Reviews taken from G2Crowd where Synergy users have reviewed and rated Synergy.

★★★★★ *"Synergy is a one-stop shop. It's a central go-to hub that I have open on my desktop all day. I can access client details, view my projects, invoice clients, track my time and so much more."*

Administrator - Civil Engineers

★★★★★ *"[I like the] Flexibility of the product to adapt to suit our established working patterns. The technical support during the trial period and then again after subscription has been absolutely first class."*

Director - Architects

★★★★☆ *"The best feature for us is having everything accessible in one place - with the ability to work remotely and still keep in touch with our team/clients."*

Studio Manager - Landscape Architects

★★★★★ *"Synergy keeps track of all the boring bits of my businesses; it makes me to feel on top of my various records and management needs - allowing me to work both on, and in, my business."*

Technical Director - Structural Engineers

Synergy — add-ons

Integrate accounts, document markup and more.

Xero
The Xero add-on for Synergy allows two-way exchange of financial data between Synergy and Xero for architects and engineers.

QuickBooks Online
The QuickBooks Online add-on for Synergy saves you time with cloud-to-cloud exchange of financial data.

Bullclip
Bullclip is a live drawing and document markup application. Export Synergy PDFs and image files to Bullclip for markup.

12d Synergy
The 12d Synergy add-on allows 12d Synergy to pull important project information from Synergy for CAD and 12d Model projects.

MYOB
The MYOB AccountRight Live add-on for Synergy enables seamless two-way exchange of financial information.

Developer API
Write integrations to Synergy projects, stages, tasks, contacts, chats, invoices and more.
