

SimpleMed+

A Smart medication dispenser

An advanced medication managing and reminder system. Designed to combine patient's ease of use with various options for the service provider; thus making it the most effective and efficient solution for improving medication adherence.

SimpleMed+ makes use of auditory & visual alerts to remind a patient to take the right medication in the correct manner, at the designated time.

Why SimpleMed+?

PEACE OF MIND

Vaica medication monitoring solution has **increased adherence** among chronically ill patients **from an average rate of 50% to sustainable record rates of 96% and above**, yielding significant health improvement benefits and long term medical costs savings.

How does SimpleMed+ work?

Once a week SimpleMed+ is refilled with a pre-packed disposable blister pack or a medication tray; Then, SimpleMed+ automatically connects to Vaica's cloud platform and downloads medication schedule settings.

SimpleMed+ Features:

- **GSM connectivity** cloud services based on an internal cellular modem
- **Built-in hub*** for vital sign monitoring devices (*optional)
- **Two (re)filling options** disposable multi-med blister pack / reusable medication tray
- **Additional reminders** can be programmed (ex: check blood sugar / apply eye drops)
- **Early dose** option to take medicine ahead of time or away from home
- **Adjustable schedule programming** – tailor made for patient's needs
- **28 Compartments** 7 day use, up to 4 dosages a day
- **Multiple caregivers** option
