Valo

Fall in ♥ with your intranet

The best digital workplace
experience on Office 365
and SharePoint

Best Intranet/Extranet
Award Winner

European SharePoint and
Office 365 Community

**Let's face it – most
employees aren't happy
with their current intranets**

People have a hard time finding anything from their corporate information graveyards. Content is out-dated, search isn't working, user experience is horrible, and forget about using it on mobile phone.

Valo Intranet is the front door to your digital workplace. It is the right tool for more effective working days: the centre of all communication, social interaction and teamwork in your organization with a beautiful user experience. Valo works with every device, it is always up-to-date, and you can start using it immediately.

Step into a digital workplace with excellent user experience and beautiful design

We can launch your new Valo Intranet within one week from the order. While we take care of the technology, you can focus on building a better business.

Stays fresh

New updates every three months make sure that your intranet will never get old. Peace of mind!

Cloud or on-premises

Supports Office 365 and on-premises SharePoint Server.

Best practises in a box

Visual front page, easy navigation, footer, breadcrumb path, drag & drop images, responsive design and more.

All the features you need

Company news and alerts, content pages, events, surveys, forms, classifieds, quick links, search... you name it.

Tested information architecture

All the best practices from our hundreds of Intranet projects.

Beautiful custom layouts

Valo doesn't look like your standard Sharepoint. Choose from three, fully responsive UI layout.

Mobile app

Keep up to date with Valo App for iPhone and Android.

In your own language

Manage your intranet content in multiple languages. A perfect solution for global organizations.
