SAM2GO NEXTGEN

ENSURE COST-EFFICIENT, COMPLIANT AND SECURE USE OF SOFTWARE AND CLOUD SERVICES

| How can I get prepared for an upcoming software audit? | How do I stay up-to-date on license use rights, virtualization, mobility, etc.? | Does my SAM data cover the entire IT infrastructure and cloud solutions? And how can I interpret and analyze the data? | How are my IT assets connected and what happens in case of a change? | How can I reduce regular manual work? | How can I monitor Shadow IT? |

Knowing about the customer challenges mentioned above, we developed SAM2GO NextGen. Our managed service for Software Asset Management (SAM) gives you continuous transparency of your software, cloud services and licenses. This enables your organization to maintain complete control over software assets, and to realize the full benefits of any investment.

GAIN TRANSPARENCY ABOUT THE OPTIMIZATION POTENTIAL OF YOUR SOFTWARE:
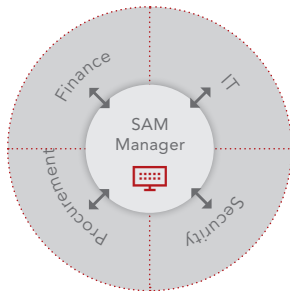

SAM2GO NEXTGEN

YOUR BENEFITS

- Gain continuous transparency and actionable insights on the installed and needed software, to plan your software budgets accurately, progress digital transformation projects with confidence and make educated business decisions.

- Manage your licenses proactively through highly automated SAM processes and real time data. The accurate and comprehensive view on your SAM data helps you to ensure compliance, lower unplanned costs for audits and prepares you for licensing renewal negotiations.

- Reduce software costs by utilizing the full value of your license entitlements and use rights. Identify easily unrequired software and consolidate redundant software to significantly lower purchasing conditions.

- Optimize operating costs through a high service automation that allows you to manage licenses, devices and users easily and on a single platform. Lower support and training expenditure due to a consolidated software portfolio.

- Increase security through automatic detection of security critical software like unsupported or malicious software.

SAM2GO NEXTGEN

SAM2GO NextGen is a cloud-based, fully-managed technical SAM service platform that supports you to use and optimize software assets and cloud services in the most intelligent way.

Communication between the SAM Manager and business areas such as IT, security, procurement and finance is key for a sustainable SAM strategy. With our managed service as a central point of data, the SAM Manager can drive this forward to ensure decisions are based on facts and real business requirements.

OVERVIEW OF THE SERVICE LEVELS AND EXTRACT FROM SERVICE COMPONENTS OF SAM2GO NEXTGEN:

Based on your business needs, you can choose a service level and add additional services to benefit from increased automated processes, individual advisory from licensing experts and a streamlined software portfolio.

Standard Edition	Advanced Edition
Technical managed SAM Platform	Managed Software Optimization (incl. Standard Ed.)
Real time data SAM data to manage your licenses and contracts proactively	Regular license compliance reports including advice on how to optimize your software costs
A single platform synchronized with all of your IT systems for easy IT asset & cloud management	Automated integration of license and contract data to ensure high-quality SAM data
High-quality data to adjust contracts and optimize license usage	Insights on how to consolidate and optimize your software
A fully supported and managed SAM platform that reduces your operational efforts	Licensing experts take on your license management to reduce your operational efforts
Automatic reporting and alerts about any risky software to prevent security issue	A Microsoft compliance and True up/contract renewal service is provided to prepare you at best for vendor negotiations

+ Service Manager: Your Single Point of Contact who guarantees maximum customer satisfaction and outstanding service (included in each service edition).

Optional Services: Additional vendors, recurring SAM Services and SAM Professional Services can be added to your selected service edition based on your business requirements.
