

Solid Software

Software solutions for business optimization

A hand holds a smartphone in the foreground, its screen showing a street scene. The street is lined with trees and has several cars driving away. The scene is captured from a high angle, looking down the road. The text 'Supplygate' is overlaid on the screen in a large, white, sans-serif font. Below it, the tagline 'Evolving and optimising the way you do business' is written in a smaller, white, sans-serif font. The background of the image is a blurred street scene with cars and trees, suggesting a busy urban environment.

Supplygate

Evolving and optimising the way you do business

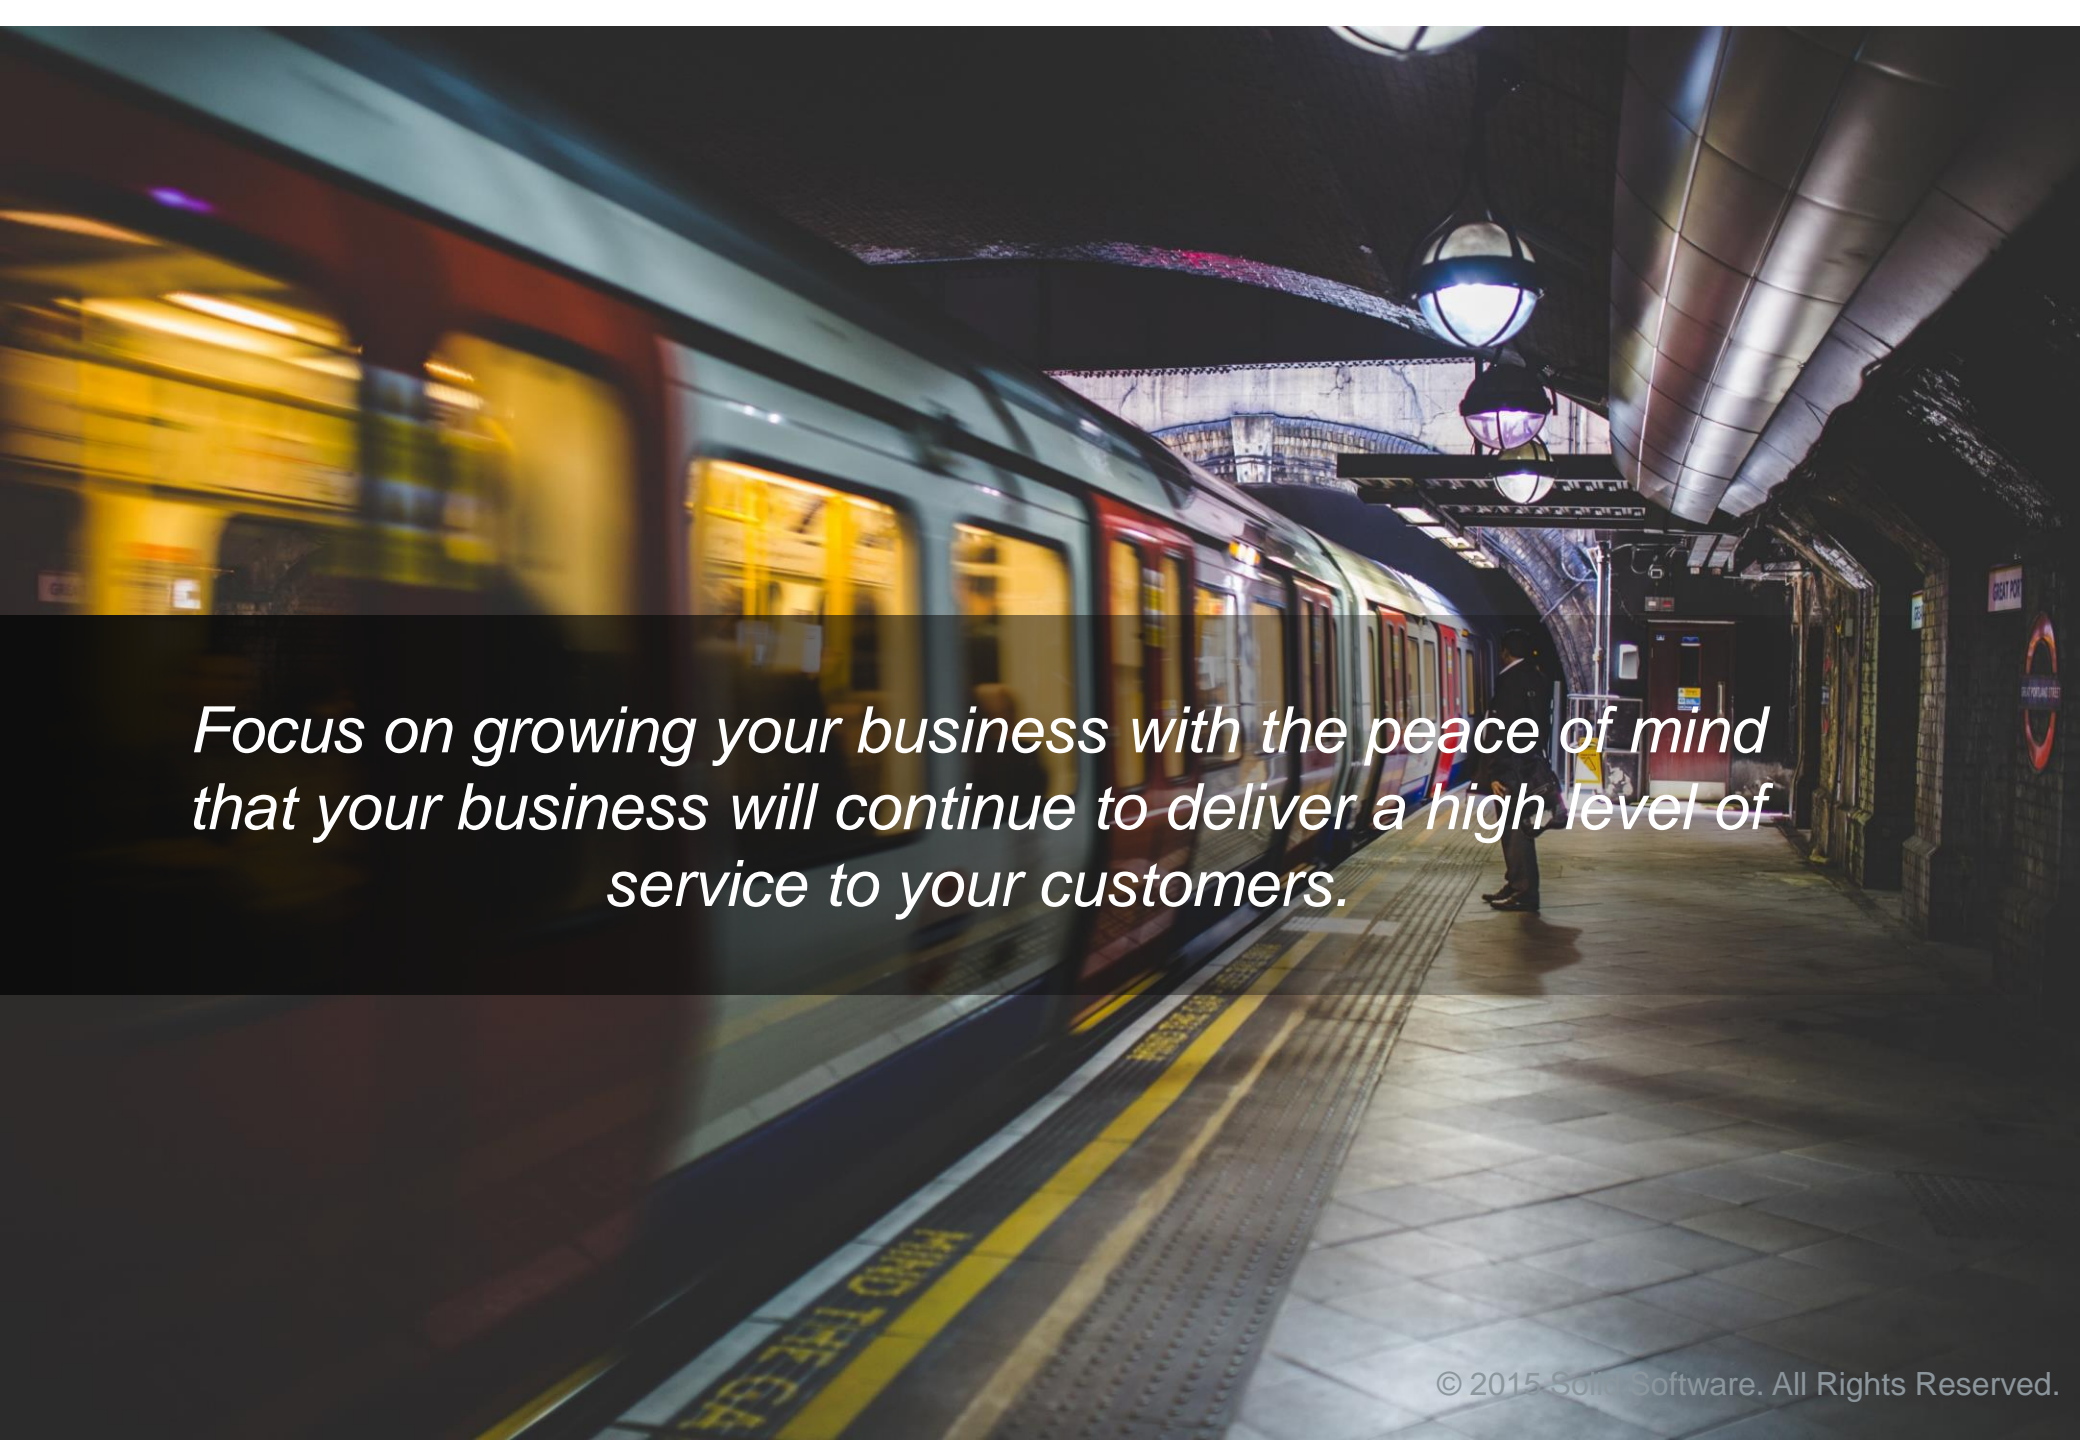

The background of the slide is a photograph of a modern industrial warehouse. On the left, a large blue circular logo with a white 'S' is mounted on a wall made of horizontal metal slats. The warehouse interior is visible in the background, featuring high ceilings with exposed steel beams, industrial lighting, and various pipes and conduits. A blue semi-transparent overlay covers the right side of the image, containing the text.

About Supplygate

Supplygate is a fully integrated supply chain management solution that allows your business to manage the end-to-end process from sourcing inputs to taking orders to delivering products to invoicing. Supplygate comprises different modules that allow the solution to be customized to mirror the way your business is set up.

This ensures seamless management of operations, order management and fulfilment across all internal departments and 3rd parties.

Supplygate also provides you with real-time monitoring of orders with an option to allow your customers to place and monitor their orders directly on the system.

A photograph of a high-speed train, possibly a Shinkansen, blurred as it moves through a station. The train is white with red and blue accents. The platform is visible on the right, with a person standing near the edge. The station has a vaulted ceiling and ornate lighting fixtures. The text is overlaid on the left side of the image.

*Focus on growing your business with the peace of mind
that your business will continue to deliver a high level of
service to your customers.*

Web and Mobile Applications

SUPPLY CHAIN SOLUTIONS

TURNERS

Supplygate's full functionality is accessed through a **mobile responsive web interface** which is customized to suit your needs and can be accessed on laptops/workstations, tablets and mobile phones.

Supplygate's Android **mobile application** provides user specific access to certain functionalities and allows for real-time monitoring and communication across the supply chain

Key Features

Sales Order Monitoring

Business Intelligence

Electronic Proof of Delivery

Fully Customizable

Automated
Notifications

Delivery Tracking

Inventory Management

3rd Party Integration

Business Role
Separation

Sales Order Processing and CRM

This core module gives your sales team the ability to take orders quickly, anywhere and anytime using a mobile application or a web portal.

The core module manages key customer details such as locations, contact people, customer specific pricing and other key information relevant to their account

Hosting

Your Supplygate solution is hosted in the cloud. This means there is no initial capital outlay required for physical hardware, very high availability of the system and minimal risk of losing your valuable business information.

This also means server and space requirements can easily be scaled up as your business grows.

Sourcing

The sourcing module allows you to manage suppliers and place orders for inputs and raw materials. Key supplier data it manages includes inputs pricing, supplier depot locations, order lead times, minimum order quantities and other supplier conditions.

Finance

This module manages important finance functions that maximise cashflow while ensuring optimal utility of credit terms with your suppliers.

Logistics

Whether you have your own fleet or you make use of 3rd party transporters, the module allows you to manage inbound and outbound logistics effectively

Inventory

The inventory module allows you to manage both inputs and finished products, monitor stock levels, eliminate stock outs and reduce stock losses.

Managed Services

We offer systems support as a cost-effective solution that allows you to focus on growing your business with the peace of mind that your business will continue to deliver a high level of service to your customers. You also have the option of accessing Business Analysts who assist with continuously customizing Supplygate as your business evolves. They focus on extracting insights from your business data and identifying opportunities to drive growth, improve efficiencies and reduce costs.

Reporting and Business Intelligence

The reporting and business intelligence module ensures that you keep your finger on the pulse of your business effortlessly. All reports are custom-built to track and monitor the key indicators that you already measure and to present them in insight rich formats.

New reports can be added easily as and when your business requires them. Reports can also be sent automatically to any internal and external stakeholders
