

Care Coordination  
Simplified

DC2Vue® is a connected care coordination software platform built specifically to deliver patient-centred care across the entire care continuum – from the hospital, to the clinic and to the clients at home in the community. It provides “one patient - one view” visibility delivering data and content across multiple models of care, resulting in a comprehensive electronic medical record that enables healthcare professionals to make better clinical, operational and financial decisions. All-in-one easy to use web and mobile user experience.

ONE PLATFORM – MANY POSSIBILITIES

**DC2Vue® NDIS Support  
Coordination Software**

Empower your workforce, with efficient scheduling to provide outstanding service.

**DC2Vue® Mental Health  
Software**

Eliminate paper, increase collaboration and provide case management for better patient care

**DC2Vue® Home and  
Community Care Software**

Enables care workers to be compliant and completely mobile at the same time while improving patient outcomes

**DC2Vue® Aged Care  
Software**

Innovating the care of people in the prime of their life by bringing client information into one, simple, accessible view

**DC2Vue® Medical Record  
Software**

Uniquely tailored, fully scalable and compliant software providing health organisations the ultimate clinical experience

**DC2Vue® Referral  
Management Software**

Track referrals at your fingertips while making the referral process more secure, time efficient and increase patient retention

## HOW DOES IT WORK?

DC2Vue<sup>®</sup> brings together your existing electronic information from siloed applications into a web-based application. It is then presented in a way that clinicians can view and access information by streamlining their everyday processes.

DC2Vue<sup>®</sup> will bring together existing data and content, automate scanning of paper and provide an electronic platform for the end user to complete all future documentation and content with automation of workflow, communication and information.

The platform is both interoperable, extendable and designed to take the advantage of Microsoft Azure cloud technologies. This provides customers with a fast, flexible platform that is responsive to changing business dynamics.

## YOUR BENEFITS

### PATIENT BENEFITS

- Empowering care recipients and family members self-service access to scheduling, results and reports via mobile apps
- Leverage an integrated platform to effectively communicate with care givers, improve quality and patient outcomes
- Connect clinicians, patients and care teams to provide streamlined services, including telehealth and collaboration at-a-distance

### CLINICIAN BENEFITS

- The ability to increase the number of patients served per day with enhanced patient workflow and increased productivity
- Revolutionary user interfaces allow clinicians to adopt fast with minimal disruptions to productivity.
- With improved data quality and analytics clinicians can make informed choices at the point-of-care

### ORGANISATIONAL BENEFITS

- Embrace Trusted Technology to secure protection, privacy, and compliance for your health data management.
- Reducing costs through decreased paperwork, improved safety, reduced duplication of testing, and improved health.
- Helping promote legible, complete documentation and accurate, streamlined coding and billing
