Unlocking the potential of part time work in a social security context

In the last decades, the amount of part-time and temporary jobs has grown significantly. Meanwhile the pressure on welfare budgets of municipalities is increasing. Therefore, municipalities are forced to stimulate part-time work. However, part-time work causes various administrative difficulties.

What is Next2Flex?

Next2Flex enables secured and automated exchange of income information between employers and municipalities. Through timely delivery of income data, the owed additional allowance can be estimated more accurately, with less administrative burden and more reliability to the clients.

Why customers use Next2Flex

This at-a-glance box

- >80% reduction of reclamations caused by errors

- >40% of the candidates found a full-time job after participating in Next2Flex
