BANKS NEED A RELIABLE PROCESSOR...

With the emergence of challenger banks, there's been a shift in the payments ecosystem and the way consumers pay for goods and services. Banks are facing the increasingly difficult task of staying ahead of the game, requiring a secure, flexible and cost-effective payment processor to stay competitive.

INTRODUCING PAYMENTOLOGY...

Taking into account these challenges, Paymentology's cloud-based issuer side processing platform offers banks a ground-breaking solution that is reliable and of best value.

THE SAFEST PROCESSING

- Advanced security features, including dynamic overwrite of the RAM (DRO)
- Total platform encryption using TLS 1.2
- PCI safe and approved processing platform

Exceeding industry standards in helping banks protect their cards and cardholder data

MORE CONTROL

- More control for clients through our granular rules engine
- Making card programs more cost effective
- Delivery of real time spend data

Helping banks launch more profitable card programs to market faster

DETAILED RECONCILIATION

- Complete transparency of data, enabling detailed reconciliation with MasterCard and Visa
- Automation of complex management reports
- Advanced revenue projection through interchange forecast tool

Saving banks time, resources and cost

WHY BANKS USE PAYMENTOLOGY'S SOLUTION

- Reliable payment processing
- Faster to market
- Greater control for clients
- Value for money
- Knowledge - 20 years of payments expertise

“ We chose Paymentology to help us launch a new prepaid card because of their in-depth knowledge and expertise in payment processing. The Paymentology platform is an impressive solution, offering greater flexibility than any other processor we've seen in the market, which will help us launch much faster.

Lycamoney

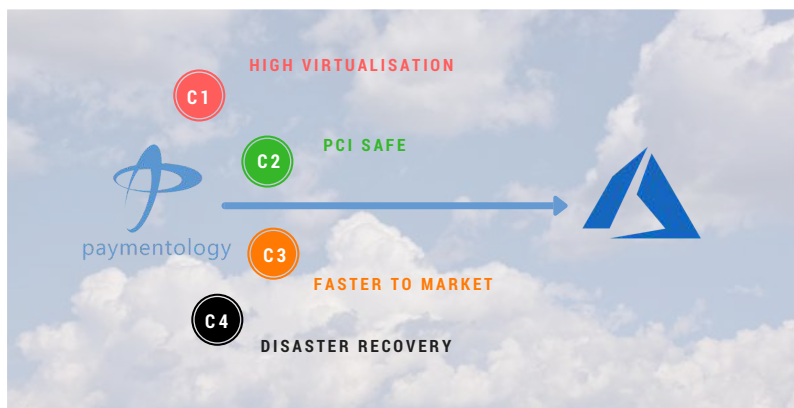

Leading the way: Paymentology's fully cloud-enabled platform on Microsoft Azure provides banks with leading-edge technology that keeps them competitive.

RAPID PLATFORM DEPLOYMENT

- Advanced resource-based control
- In-depth replication utility
- Faster to market

ENHANCED SECURITY

- Centralised security rules
- Cutting-edge intrusion detection system (IDS)
- Advanced user access control

“ The Paymentology team has deep technical knowledge and understanding in the issuer side processing domain. Over the past year we have used their specialist consultancy services on several critical projects. They are always very professional and willing to go the extra mile. I am sure we will use them again!
